#### ABSTRACT

This document, which lists the horticultural-agricultural technologies competencies identified by representatives from business, industry, and labor as well as educators throughout Ohio, is intended to assist individuals and organizations in developing college tech prep programs that will prepare students from secondary through post-secondary associate degree programs for employment as Landscape Designer/Manager Landscape Technicians; Golf Course Maintenance Technicians; Lawn Care Specialist/Technicians; Tree Maintenance Technician/Arborists; Nursery Technicians; Floral Designers; Agricultural Custom Applicators; Agricultural Crop Consultants; and Greenhouse Technician/Managers. The competencies, which are separated into essential competencies needed to ensure a minimal level of employability and recommended competencies, are organized by instructional units and include suggestions as to when students should be introduced to, reinforced, and proficient at them. The included Technical Competency Profile (TCP) matrix includes a list of 29 technical competencies that are required or recommended for the different types of employment listed above. Some of the common competencies are as follows: plant science; workplace safety; basic accounting; daily management tasks; supervision; sales and marketing; horticulture fundamentals; horticultural plant health care; equipment maintenance; soil science and management; and environmental science and ethics. Includes a list of TCP panel members. (MO)

December 7, 1998

#### **Educator Panel**

**Glenn Abke**, Professor, Agri-Business Owens Community College Toledo, Ohio

John Allen, Instructor, Horticulture Jackson High School Massillon, Ohio

Christi Bachman, Instructor, Agriculture Education Liberty Union High School Baltimore, Ohio

**Bob Boufford**, Associate Professor Clark State Community College Springfield, Ohio

Chris Carlson, Director/Professor,
Horticulture
Kent State University – Salem Campus
Salem, Ohio

Steve Cooper, Instructor, Agriculture Education Mechanicsburg High School Mechanicsburg, Ohio

Sharon Davis, Floral Design/Greenhouse Maintenance Instructor, Agriculture Buckeye Career Center New Philadelphia, Ohio

Susan Everett, Associate Professor, Agribusiness Clark State Community College Springfield, Ohio

Chris Foley, Assistant Professor, Agri-Business Owens Community College Toledo, Ohio Tom Franck, Horticulture Instructor, Urban Forestry Kent Roosevelt High School Kent, Ohio

Mike Fulton, Associate Professor, Horticulture Ohio State ATI Wooster, Ohio

**Dave Goerig**, Instructor, Horticulture Columbiana County Career Center Lisbon, Ohio

Tom Green, Agriculture Instructor, Horticulture Marlington High School Alliance, Ohio

Waid Lyons, Instructor, Agriculture Miami Valley Career Tech. Center Clayton, Ohio

Kevin McCann, Landscape Teacher, Horticulture Toledo Agriculture Education Center Toledo, Ohio

Dave Munn, Associate Professor, Ag. Ind.DivisionOhio State ATIWooster, Ohio

Steven O'Neal, Professor, Landscape Design/Build Columbus State Community College Columbus, Ohio

Maurice Peoples, Technician, Horticulture Kent State University – Salem Campus Salem, Ohio

**Dave Richards**, Instructor, Horticulture Auburn Career Center Concord Twp, Ohio

**Dan Rueger**, Teacher, Horticulture Ashland High School Ashland, Ohio

**Jeff Shoup**, Agriculture Supervisor Miami Valley Career Tech. Center Clayton, Ohio

Dave Sproull, Landscape Instructor, Horticulture Greene County Career Center Xenia, Ohio **Tim Turner**, Instructor, Agriculture Education Liberty Union High School Baltimore, Ohio

**Sam Woods**, Agriculture Technology Ohio State ATI Wooster, Ohio

**Debbie Woodworth**, Instructor, Horticulture Mentor Public Schools Mentor, Ohio

#### OCCUPATIONAL DEFINITIONS

# **Horticulture-Agriculture Technologies**

#### Landscape Designer/Manager - Landscape Technician

An individual who applies horticultural engineering and architectural principles to develop residential, commercial, and/or recreational environments which are both functional and beautiful and seeks Pesticide Applicator Certification. Technical skills should include, but not be limited to:

- plant identification, selection, and culture
- drafting
- equipment maintenance and operation
- landscape contracting
- landscape construction
- landscape design
- precision agriculture
- safety regulations
- application of pesticides and fertilizers
- customer sales and services
- computer skills
- supervision
- record keeping and laws
- basic soil and plant science
- pest identification and management

#### Golf Course Maintenance Technician

An individual who applies horticultural principles and business skills in managing a golf course. Technical skills should include, but not be limited to:

- turf selection and management
- irrigation and drainage
- care of trees, shrubs and flowers
- operation of equipment
- repair of equipment
- golf course organization/set-up
- design concepts and renovation
- golf course maintenance
- business management.

vi

- building/facility maintenance
- knowledge of game of golf
- precision agriculture
- safety regulations
- application of pesticides and fertilizers
- customer sales and services
- computer skills
- supervision
- record keeping and laws
- basic soil and plant science
- pest identification and management

#### Lawn Care Specialist/Technician

An individual who applies horticultural principles and business skills to install, manage, and maintain lawns, athletic fields, or other turf areas. Technical skills should include, but not be limited to:

- grass/cultivar selection
- turf identification
- installation of turf areas
- maintenance of turf areas
- fertilization of turf areas
- irrigation and drainage
- aeration methods
- equipment operation and maintenance
- knowledge of environmental impact of lawn pesticides and fertilizers
- precision agriculture
- safety regulations
- application of pesticides and fertilizers
- customer sales and services
- computer skills
- supervision
- record keeping and laws
- basic soil and plant science
- pest identification and management

#### Tree Maintenance Technician/Arborist

An individual who applies horticultural principles and business skills to residential, commercial, governmental, and utility tree care. Technical skills should include, but not be limited to:

- tree selection
- transplanting trees
- pruning trees
- fertilizing trees
- tree removal
- lightning protection
- cabling and bracing of trees
- operation and maintenance of equipment
- identification of plant
- precision agriculture
- safety regulations
- application of pesticides and fertilizers
- customer sales and services
- computer skills
- supervision
- record keeping and laws
- basic soil and plant science
- pest identification and management

## Nursery Technician

An individual who applies horticultural principles and business skills in nurseries, garden centers, arboretums, and botanical gardens and seeks to be a Certified Nursery Technician. Technical skills should include, but not be limited to:

- identification of plants
- plant production
- propagation
- plant culture
- equipment operation and maintenance
- soil sampling and analysis
- drainage and irrigation
- pruning
- inventory control
- safe chemical handling
- precision agriculture
- safety regulations

- application of pesticides and fertilizers
- customer sales and services
- computer skills
- supervision
- record keeping and laws
- basic soil and plant science
- pest identification and management

#### Floral Designer

An individual who applies horticultural and artistic principles with business skills to design fresh and artificial arrangements. Technical skills should include, but not be limited to:

- identification of flowers and their care requirements
- handling of flowers and greens
- handling and use of pot plants
- floral arrangements
- decorative use of foliage
- management
- design
- safety regulations
- safety regulations
- customer sales and services
- computer skills
- supervision
- record keeping and laws

#### **Agricultural Custom Applicator**

An individual who applies knowledge of agricultural principles of fertilization and pesticides to aid in the production of crops and seeks to be a Certified Crop Advisor (CCA). Technical skills should include, but not be limited:

- soil sampling
- identification of plant nutrient needs
- fertilization of crops
- equipment maintenance and operation
- knowledge of environmental impact of application of agricultural pesticides and fertilizers
- emergency first aid
- precision agriculture

- safety regulations
- application of pesticides and fertilizers
- customer sales and services
- computer skills
- supervision
- record keeping and laws
- basic soil and plant science
- pest identification and management

#### **Agricultural Crop Consultant**

An individual who applies agricultural principles to aid farmers and other production agriculturalists and seeks to be a Certified Crop Advisor (CCA). Technical skills should include, but not be limited to:

- field evaluation
  - knowledge of crop management
  - crop selection
  - soil sampling and analysis
  - soil management and conservation
  - crop inspection
  - fertilization of crops
  - marketing and sales
  - knowledge of environmental impact of agricultural practices
  - application of agricultural chemicals
  - safe chemical handling
  - precision agriculture
  - safety regulations
  - application of pesticides and fertilizers
  - customer sales and services
  - computer skills
  - supervision
  - record keeping and laws
  - basic soil and plant science
  - pest identification and management

11

#### Greenhouse Technician/Manager

An individual who applies horticultural and business principles in all areas of greenhouse production, as well as in sales, service, and consulting. Technical skills should include, but not be limited to:

- identification of plants
- plant production
- plant propagation
- fertilization
- pruning
- pest and pathogen management
- greenhouse environmental control
- harvesting, handling and use of pot plants, bedding plants, foliage, cut flowers, vegetables, hanging baskets, and perennials
- greenhouse equipment maintenance
- marketing and sales
- greenhouse construction
- communication skills

#### LEVELING CODES

#### GRADE LEVEL

12 = by the end of grade 12

AD = by the end of the Associate Degree

#### **DEPTH**

I = Introduce (applies to at least three or 25% of the competency builders)

R = Reinforce or add depth (after introducing or proficiency)

P = Proficient (achievement of the competency without supervision)

#### OTHER (Determined by Business, Industry and Labor Panel)

**Essential Competency:** Competency is needed to ensure **minimal** level of employability. Entry level employees should be able to perform this competency without supervision. Competencies required for certification, licensure, and/or national skills standards should be tagged as essential.

**Recommended Competency:** Competency should be included but is not essential for minimal level of employability.

Delete: Competency should not be included.

**Unit:** Plant Science

BIL:

Essential

EDU:	12	AD	AC
	I	P	

**Competency:** 

Demonstrate general knowledge of plant anatomy

#### **Competency Builders:**

List the parts of the plant and their functions including: seed (embryo, cotyledon, coat), root, modified stems (tuber, rhizome, stolon, corm, bulb) stem (xylem, phloem, pith, cambium), leaf (blade, lobe, auricle, ligule), meristem (apical, dominant, terminal, auxiliary bud), and flowers (petals, corolla, sepals, calyx, bracts, anther, stamen, style, ovary)

Identify the major components of cells

Identify different types of root cells, where they are found in the root and what function they serve

Identify different types of stem cells, where they are found in the stem and what function they serve

Identify different types of leaf cells, where they are found in the leaf and what function they serve

Identify differences between meristematic tissue and differentiated tissue Explain the function of the major tissue systems and how they are arranged in plant organs

EDU:	12	AD	AC
	I	P	

Competency: Identify different types of sexual and asexual reproduction

#### **Competency Builders:**

Identify the male and female flower parts as well as non-sexual flower parts and their modifications

Identify the parts of a seed

Identify the environmental influences on seeds that are critical for germination

Explain the pollination process and factors that contribute to success

Analyze germination results from seeds using different seeds and media

Identify advantages of utilizing hybrid seeds

Identify factors that affect germination percentage

Explain the differences between the basic process of asexual growth and sexual cell development

Explain the process of propagating plant material by crown division; layering; and rhizomes and stolons

BIL: Recommended

EDU:	12	AD	AC
	I	R	

Competency: Identify genetic principles and terminology

#### **Competency Builders:**

Identify major steps or phases of mitosis

Identify major steps or phases of meiosis

Explain the similarities and differences between mitosis and meiosis

Explain dominant and recessive gene characteristics

Explain homozygous and heterozygous gene characteristics

Identify difference between genotype and phenotype

Describe the possible impact of genetic engineering on plant improvement

Describe possible applications of genetic engineering and gene splicing on pest control

EDU:	12	AD	AC
	I	Р	

Competency: Classify plants

#### **Competency Builders:**

Describe the functions of plants (e.g., food, feed, fiber, soil, wood, recreation, erosion control, nutrient recycling, medicinal, industrial-dyes, chemicals)

Describe the basis for plant classification

Identify the components of the binomial system of nomenclature

Identify the life cycle conditions necessary to classify a plant as an annual, a biennial, or a perennial

Classify living plant seeds or reproductive structures according to life cycle Identify basic plant biological classification units (i.e., family, order, class, division, genus, species)

EDU:	12	AD	AC
	I	P	

Competency: Explain plant metabolism and physiology

## **Competency Builders:**

Identify components of photosynthesis processes in plants
Identify plant pigments
Explain the importance of plant pigments to photosynthesis
Identify different color patterns found in plant leaves

Describe the effect of different color patterns found in plant leaves on photosynthesis

Outline the respiratory process

Explain the inter-relationship between the respiratory process and photosynthesis and plant growth

Contrast transpiration and evaporation

Explain the use of water within the plant

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate knowledge of plant growth and development

## **Competency Builders:**

List micro or macro nutrients

Classify micro or macro nutrients

Describe the process of water uptake and use in plants

Explain the effects of light intensity, quality and duration on plant growth

Explain the concept of plant hardiness and the classification based upon minimum temperature tolerance

Explain the effect of temperature on growth rate, life cycle, seed viability, and germination as well as plant reproduction

Identify major classes of chemical/hormonal growth regulators and their functions

EDU:	12	AD	AC
	I	P	

Competency: Explain plant nutrition and fertilization

#### **Competency builders:**

Define available nutrients, leaching, element, organic fertilizer and inorganic fertilizer

Identify the primary elements and their functions in plant growth

Identify deficiencies caused by the lack of the minor elements

Differentiate between organic and inorganic fertilizers

Describe the advantages and disadvantages of organic versus inorganic fertilizers

Describe the hazards associated with over fertilization

EDU:	12	AD	AC
·	I	Р	

Competency: Identify environmental factors affecting plants

#### **Competency Builders:**

Describe external influences on plant growth
Explain photoperiodism and dormancy in plants
Describe affects of plant hormones
Explain the commercial uses of auxins
List optimum growth conditions for different types of plants
Describe the influence of day length on plant growth
Explain how the cycle of the seasons influences plant growth

**BIL:** Recommended

EDU:	12	AD	AC
	I	R	

Competency: Explain how to improve plant seed quality

#### **Competency Builders:**

Define heredity, genetics, inbreeding, crossing, progeny, self-fertilization, cross fertilization, mutation, hybrid, systemic pesticide, toxic, and vigor

Explain seed development, morphology, and composition

List the characteristics of good seeds

Describes the factors which create poor seed quality

Describe the history of plant improvement

List major aims of plant breeders

Describe three methods of plant improvement

Identify state agency responsible for seed certification

Describe major points and economic aspects to consider when identifying varieties for planting

Explain the danger of monogenetic type crops (e.g., southern corn blight)

Describe the possible impact of genetic engineering

Describe breeding for pest resistance (e.g., insects, nematodes, and diseases)

Describe the classes of seeds (e.g., breeders, registered, certified)

Differentiate between hybrid seed and seeds from open pollinated or self-fed plants

Explain how "hard seeds coat" can be used to maintain high quality seed

Explain why plant breeding take several years

Explain why breeders have to constantly be developing improved varieties

EDU:	12	AD	AC
	I	P	

Competency: Describe plant diseases

## **Competency Builders:**

Define microorganism, pathogens, symptoms, day length, wilt, mosaic, blight, curl, dwarfing, gall, mildew, rot, smut, and disease

Identify major causes of plant disease

Describe the symptoms and effects of major diseases on major agricultural/horticultural crops

Identify several methods by which diseases are transmitted in plants

Explain Koch's Postulates and their use in determining primary and secondary pathogens

Explain how fungi attack plants

Describe the typical structure and function of fungi

Describe the life cycle of wheat rust and potato blight

Differentiate between a saprophyte and a parasite

Explain how some fungi are helpful to plants

Explain how fungi are classified

Explain how bacteria are classified

Explain that bacteria affect their host using exotoxins or endotoxins

Explain that the ability of bacteria to reproduce by fission makes them dangerous

Explain how viruses are noncellular pathogens that use the cell's DNA or RNA to reproduce

Explain how viruses are classified by their host

Describe the lytic cycle of a virus

Identify environmental conditions that favor or hinder disease development

EDU:	12	AD	AC
	I	P	

Competency: Explain management of plant diseases

#### **Competency Builders:**

Define damping off, fumigant, fungicide, resistance, sprays, dust, volatile, crop rotation and sanitation

Explain the "disease triangle"

Describe cultural practices that may be used to prevent plant diseases

Describe the impact of genetic engineering on control of plant diseases

Explain how chemicals manage diseases

Explain how genetic resistance reduces production costs and potential environmental impact from spraying

Explain the economic importance of managing plant diseases

EDU:	12	AD	AC
	I	P	

Competency: Explain weed management

#### **Competency Builders:**

List ways weeds spread

List reasons weeds are harmful

List methods of weed management

Explain mode of action of common herbicides

Explain weed resistance to herbicides

Describe possible applications of genetic engineering and gene splicing to weed control

Explain how herbicides kill weeds

Identify the major weed species and explain options available for managing each

EDU:	12	AD	AC
	I	P	

Competency: Explain moisture control

#### **Competency Builders:**

Define irrigation, mulch, organic matter, runoff, seepage, subsoiling, and tillage List three methods of moisture control

List the cultural practices used in moisture control (i.e., annually and at planting)

Describe importance of internal and external drainage in soils

Describe importance of irrigation to plants

Describe the methods of irrigation (e.g., drip, furrow, sprinkler, flood)

Explain the hydrologic cycle

Explain how irrigation causes salinity problems

Explain salt water intrusion in irrigation wells

Explain subsidence caused by removal of irrigation water

Describe methods used to reduce irrigation water loss

Explain the use of tensiometers and moisture meters

Explain irrigation scheduling

**Unit:** Workplace Safety

**BIL:** 

Essential

EDU:	12	AD	AC
	I	P	

**Competency:** 

Demonstrate safe work habits

#### **Competency Builders:**

Wear protective clothing and equipment, including eye and ear protection as required

Interpret information on signs and labels

Explain why safety equipment and personal protective equipment are necessary, including cost and consequences

Check working condition of safety equipment and personal protective equipment (e.g., physically, listening)

Report malfunctioning safety equipment and personal protective equipment Observe safety precautions when handling chemicals or fertilizers

Follow personal cleanup procedures after handling chemicals and fertilizer Interpret hazardous materials notices

Recognize the existence of hazardous materials, their use and disposal procedures according to government regulations (e.g., fertilizers, mulch, gasoline)

Explain why wastewater must be disposed of safely

Identify safety problems within work environment (e.g., loose wiring, broken concrete, slippery surfaces)

Pay attention to safety as you work (i.e., don't create safety problems that are not there)

Explain why safety problems and corrective measures are important (e.g., focus on loss of time, money, energy)

Differentiate safety as it relates to customer vs. employees

EDU:	12	AD	AC
	I	P	

Competency: Maintain safe work environment

#### **Competency Builders:**

Maintain clean and safe work area

Identify hazards presented by hazardous materials

Identify hazardous materials and location of Material Safety Data Sheets (MSDS), including comparative hazards

Follow MSDS safety information and "Right-to-Know" legislation

Comply with shop and equipment safety rules

Follow environmental and safety issues pertaining to the Environmental Protection Agency (EPA), Food and Drug Administration, OSHA, and/or other state and federal regulations

Report safety hazards and accidents to supervisor immediately

Complete detailed accident report and explain the consequences

Identify why safety devices are important, and the consequences of their absence Maintain safety devices

Comply with general - use and restricted - use product regulations

Recognize safety hazards at each work site (e.g., trees, underground utilities)

Minimize risks associated with safety hazards

Monitor regulation updates

Follow government regulations and restrictions

Apply fire safety rules and procedures

Apply basic knowledge of first aid and CPR when necessary

EDU:	12	AD	AC
·	P	R	

**Competency:** Operate equipment safely

#### **Competency Builders:**

Follow safety rules for equipment operation and maintenance Comply with safety zones around equipment Operate equipment defensively Interpret safety symbols Use slow - moving - vehicle signs when operating vehicles on road Keep riders off mobile equipment Maintain safety shields on all equipment Shut down power equipment before servicing Report potential equipment safety hazards Follow manufacturer's service recommendations Maintain valid driver's license Perform lockout and tagout Identify equipment safety issues

**Unit:** Basic Accounting

BIL: Essential

EDU:	12	AD	AC
	P	R	

Competency: Use arithmetical skills for accounting

# **Competency Builders:**

Compute cash discounts for various terms Compute extension, sales tax, and totals of sales slips

BIL: Recommended

EDU:	12	AD	AC
·	I	R	

Competency: Identify accounting principles

#### **Competency Builders:**

Identify basic accounting principles

Identify basic accounting applications

Explain use of record keeping in relation to business and economical applications

Prepare budgets

Prepare comparative (actual vs. budget) income statement

Define cost accounting, direct materials, direct labor and overhead

Calculate depreciation

Complete a profit and loss statement

**Unit:** Daily Management Tasks

BIL: Essential

EDU:	12	AD	AC
	I	P	

**Competency:** Perform general office duties

# **Competency Builders:**

Use office machines
Plan work schedules
Operate computer
Maintain organized work area
Take proper notes
Communicate messages properly

**BIL:** Recommended

EDU:	12	AD	AC
	I	R	

Competency: Order merchandise

## **Competency Builders:**

Identify when to order particular merchandise Identify where to order particular merchandise Identify how to order particular merchandise Identify how much merchandise to order Outline amount of storage needed Use price lists and catalogs

Unit: Supervision

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate human resource skills

#### **Competency Builders:**

Apply interview skills

Apply appropriate management and leadership styles

Display managerial and supervisory skills

Apply human relations skills

Communicate performance expectations

Adhere to company policies regarding discrimination and harassment

Document personnel issues

Recognize legal requirements of employee and employer relations

Display team building skills

BIL: Recommended

EDU:	12	AD	AC
	I	R	

Competency: Manage human resources

## **Competency Builders:**

Use foresight to anticipate and manage change
Discipline employees
Counsel employees (e.g., career objectives)
Dismiss employees
Maintain performance records
Address employees regarding disciplinary action
Recommend employee for promotion
Explain procedure for handling grievances
Evaluate employee performance

EDU:	12	AD	AC
	I	P	

**Competency:** Manage work flow

# **Competency Builders:**

Communicate operating policies and procedures Meet production standards Interface with other departments/crews Prioritize work Assign work to other crew members Delegate work Provide instructions Monitor progress Complete productivity reports

Complete managerial reports Maintain appropriate work environment Troubleshoot operational problems Complete assigned tasks in a timely manner

Coordinate with team members

EDU:	12	AD	AC
		I	

Competency: Manage projects

# **Competency Builders:**

Develop strategic plan
Develop project budget
Schedule work assignments
Apply quality measures and counter measures

Sales and Marketing **Unit:** 

> BIL: Essential

EDU:	12	AD	AC
	P	R	

Promote company image **Competency:** 

### **Competency Builders:**

Explain importance of image Identify factors affecting image, positive and negative Project company image Exhibit good personal hygiene Perform quality work Follow instructions and uniformity Keep equipment clean Follow dress code

Handle customer complaints Communicate positively with customers Read company manual

Maintain continuity and uniformity of company logo

EDU:	12	AD	AC
·	I	R	

Competency: Demonstrate presale skills

## **Competency Builders:**

Maintain product and service knowledge
Differentiate between product features and product benefits
Examine types of selling techniques
Identify types of customers
Identify customer buying motives and signals
Maintain prospective customer relationship

EDU:	12	AD	AC
		I	

Competency: Demonstrate post sale skills

# **Competency Builders:**

Compose personal appreciation notes
Follow up purchases and sales
Develop repeat customer contact list
Add customer to annual mailings
Develop a follow-up file
Demonstrate seasonal greetings

EDU:	12	AD	AC
·	I	R	

Competency: Conduct sale

# **Competency Builders:**

Greet customers

Use appropriate questioning techniques

Use appropriate selling techniques

Identify customer needs, problems and recommendations

Describe services and expectations

Explain extent of guarantee

Access support services

Close sale

Use good telephone skills

Compute taxes

Record sales information

Utilize product demonstrations, exhibits, and displays

Address customer complaints

Resolve customer complaints

Process tax exempt sales transactions

Process charge account sales transaction

Process charge card sales transaction

Calculate customer discount

Wrap purchases

Handle special orders

EDU:	12	AD	AC
	I	R	

Competency: Prepare estimate

# **Competency Builders:**

Calculate square footage and cubic yards
Use price list
Estimate total amount of materials needed
Estimate fixed costs

EDU:	12	AD	AC
,		I	

Competency: Advertise products and services

# **Competency Builders:**

Identify products and services to be presented
Identify opportunities for publicity
Implement presentation
Prepare advertising materials
Implement product demonstrations, exhibits, and displays
Select signs
Arrange retail area according to season

EDU:	12	AD	AC
	I	R	

Competency: Maintain price lists and catalogs

# **Competency Builders:**

Compare prices of similar products and services Outline material and service availability Keep product and service catalogs current Keep profit and loss in line

EDU:	12	AD	AC
	I	R	

Competency: Price merchandise/service

### **Competency Builders:**

Estimate fixed and variable expenses
Calculate markup
Calculate break-even point
Compare pricing strategies
Identify factors affecting pricing
Price merchandise
Prepare merchandise for inventory or display
Use computerized pricing systems
Attach price tags

EDU:	12	AD	AC
	I	R	

Competency: Display merchandise

# **Competency Builders:**

Design displays
Set up displays
Select items for display
Use props
Identify display areas

EDU:	12	AD	AC
	I	Р	

Competency: Provide technical assistance

# **Competency Builders:**

Provide customer with informative materials
Interpret product labels
Provide care and safety instructions
Demonstrate product use
Explain safety precautions regarding product use or application
Outline extent of product guarantee
Address customer complaints
Identify when merchandise is to be delivered
Provide specialized care instructions

# **Unit:** Horticulture Fundamentals

**BIL:** Essential

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate knowledge of the horticulture industry

#### **Competency Builders:**

Identify fields of endeavor within the horticulture industry
Describe economic importance of the horticulture industry
Describe environmental importance of the horticulture industry
Identify employment opportunities within the horticulture industry
Identify regulatory aspects of the horticulture industry
Identify continuing education opportunities within the horticulture industry
Identify professional organizations within the horticulture industry

EDU:	12	AD	AC
	I	Р	

**Competency:** Identify plants

# **Competency Builders:**

Classify plants as monocots or dicots
Identify plants using scientific and common name
Spell and pronounce using scientific and common name
Classify plants as annuals, biennials, and perennials
List environmental preference of plants (e.g., shade, sun, wind, moisture, soil conditions)

Classify plants according to growth habit

36

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate pruning skills

# **Competency Builders:**

Identify methods of pruning plants to achieve desired growth
Select proper pruning tools for the task
Identify appropriate time to prune plants
Explain root pruning appropriate plants
Prune plants for desired shape and growth
Identify means of sterilizing pruning tools
Distinguish between proper pruning and shearing
Develop proper pruning equipment maintenance (e.g., schedule repair)

EDU:	12	AD	AC
	I	Р	

Competency: Keep records

# **Competency Builders:**

Keep fertilizer and pesticide application records Keep equipment maintenance and service records Keep job records and daily log sheets Keep inventory records

38

Unit: Horticultural Plant Health Care

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Make proper plant selection

### **Competency Builders:**

Identify plants appropriate to a region

List environmental preference of plants (e.g., shade, sun, wind, moisture)

Classify plants according to growth habit

Match tree and planting site

Describe installation

Perform planting and transplanting

Describe proper care after planting

Identify disease-resistant and insect-resistant species/cultivars

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate knowledge of cultural practices

# **Competency Builders:**

Demonstrate knowledge of soils

Demonstrate knowledge of soil, water, air relationship, temperature, light and fertilizer

Explain methods of plant-water management

EDU:	12	AD	AC
	I	P	

Competency: Explain knowledge of irrigation and drainage

### **Competency Builders:**

Explain methods of aerification and vertical mulching

Explain irrigation procedures

Explain aerification procedures

Explain drainage procedures

Explain importance of mulch (e.g., air, water, temperature, nutrients)

Identify types of mulching materials

Demonstrate proper mulching techniques

EDU:	12	AD	AC
·	I	P	

Competency: Manage pests

#### **Competency Builders:**

Classify insects according to feeding habits

Identify common insects, weeds, and diseases of plants

Describe life cycle of insect pests, weeds and diseases

Describe methods (i.e., biological, chemical, and cultural) of managing plant insects, weeds and diseases

Report insect, weeds and disease damage for proper control measures

Interpret information on a pesticide/agricultural chemical label

Interpret spray compatibility charts

Select pesticides according to the product label

Simulate mixing of pesticides according to the product label

Apply fundamentals of IPM

Simulate application of pesticides according to the product label

Clean spray equipment

Calibrate spray equipment

Dispose of pesticide containers in compliance with local, state, federal, and EPA regulations

Maintain pesticides records

Describe symptoms of pesticide poisoning and identify first aid required

Select pesticide according to controlling action (e.g., stomach, contact, systemic)

Identify chemical injury to plants

Take pesticide applicator test

EDU:	12	AD	AC
	I	R	

Competency: Manage pests in trees and shrubs

# **Competency Builders:**

Select the proper pesticide
Identify coverage and coverage requirements
Prepare pesticide solutions
Adjust sprayers
Operate sprayers
Simulate spraying of prescribed area safely
Clean sprayers
Repair sprayers

EDU:	12	AD	AC
·	. I	P	

Competency: Implement integrated pest management (IPM) program

#### **Competency Builders:**

Follow general safety precautions
Identify insects, diseases, weeds, and vertebrate pests
Identify pest damage
Calculate area to be covered

Complete certification requirements for prescribed chemical application

Evaluate chemical/cultural/biological control options

Interpret chemical labels and compatibility charts

Identify appropriate methods

Estimate pest population numbers

Assess degree of damage

Outline when management is needed

Map chemical application, methods, and results

Document chemical application, methods, and results

Compute treatment costs

Recognize environmental limitations

Select options

EDU:	12	AD	AC
	I	P	

Competency: Identify tree and shrub pests

# **Competency Builders:**

Differentiate chewing, sucking, boring, and rasping insects
Differentiate bacterial, viral, and fungal diseases
Explain preventative measures to protect trees and shrubs from injuries

EDU:	12	AD	AC
·	I	P	

Competency: Diagnose and treat plant problems

# **Competency Builders:**

Demonstrate the diagnostic process
Explain tree "stress" and the "healthy" tree
Identify common insects and diseases
Identify physiological disorders and injuries
Describe prevention treatment and continued health care
Demonstrate methods of applying fertilizer to trees and shrubs
Identify abiotic problems (e.g., weedeater, mechanical, paving damage)

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate proper pruning practices as related to plant

health care

### **Competency Builders:**

Identify dead, diseased, and dying branches and plants
Demonstrate proper pruning/removal techniques
Demonstrate importance of maintaining natural growth habit of plants
Explain importance of timing as related to pruning, mowing, etc.
Demonstrate accepted industry standards

EDU:	12	AD	AC
	I	P	

**Competency:** Apply fertilizers

#### **Competency Builders:**

Identify soil and media materials
Identify types and kinds of fertilizers
Identify methods of distributing fertilizers
Interpret information on tag or container
Identify symptoms of nutritional deficiencies of plants
Collect a soil sample for soil analysis
Identify fertilization requirements of plant materials
Set a fertilizer schedule
Apply fertilizer and soil amendments
Apply special fertilization methods appropriate to a region/plant group
Describe symptoms of fertilizer burn
Clean fertilizer application unit
Maintain fertilization records

Unit: Equipment Maintenance

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Maintain equipment

### **Competency Builders:**

Follow general safety precautions
Calibrate equipment
Adjust belts
Adjust chains
Inspect assembled equipment for operating defects
Lubricate parts
Sharpen equipment
Maintain service records
Establish a preventative maintenance program

EDU:	12	AD	AC
	I	P	

Competency: Maintain engine cooling systems

# **Competency Builders:**

Follow general safety precautions
Test coolant mixture
Adjust or replace fan belt
Replace hoses
Inspect for leaks
Add coolant
Flush cooling system
Dispose of coolant and containers safely

EDU:	12	AD	AC
	P	R	

**Competency:** Service engine lubricant systems

# **Competency Builders:**

Follow general safety precautions
Check oil level
Select oil
Change oil and oil filters
Maintain grease fittings
Replace grease fittings
Grease or oil joints
Dispose of oil and containers safely

EDU:	12	AD	AC
	I	Р	

Competency: Maintain small-engine fuel and air systems

# **Competency Builders:**

Follow general safety precautions
Service air cleaner
Bleed diesel fuel system
Mix gas and oil for two-cycle engine
Service crankcase ventilation components
Clean carburetor
Adjust carburetor
Service fuel filter assembly
Replace exhaust system components
Add proper fuel

EDU:	12	AD	AC
	I	Р	

Competency: Maintain small-engine electrical systems

### **Competency Builders:**

Follow general safety precautions
Replace spark plugs and wires
Clean spark plugs
Adjust spark plug gap
Check specific gravity of battery
Install battery
Clean battery terminals, cables, and battery box
Charge battery
Replace fuses and light bulbs

EDU:	12	AD	AC
	. I	Р	·

Competency: Service wheels and tires

# **Competency Builders:**

Follow general safety precautions
Inspect tires
Check tire pressure
Inflate tires
Tighten lug nuts
Replace flat tires
Rotate tires
Check valve stems
Patch tubes

EDU:	12	AD	AC
	P	R	

Competency: Maintain hydraulic systems

# **Competency Builders:**

Follow general safety precautions
Inspect system for oil leaks
Clean couplings
Inspect hoses
Identify proper reservoir
Check oil
Add oil
Replace oil filter
Dispose of hydraulic fluids safely
Bleed air from system
Replace hoses

EDU:	12	AD	AC
	I	P	

Competency: Perform predeparture functions

### **Competency Builders:**

Follow general safety precautions

Connect front-end-operated equipment

Connect 3-point-hitch equipment

Attach power takeoff equipment

Detach power takeoff equipment

Hitch towed equipment

Connect hydraulic lines

Connect electrical hookups

Connect safety chains

Refuel power units

Inspect working condition of lights

Check fluid levels

Secure all equipment and materials

Check tires and tire pressure

Check mirrors

Maintain service schedule

Check prestart mechanism

Flag extended materials

Inspect belts

Adjust belts

Add coolant

Inspect for leaks

Service air cleaner

Mix gas and oil for two-cycle engine

Label fuel containers properly

(BIL strongly recommends that this competency be addressed)

EDU:	12	AD	AC
	I	R	

Competency: Operate equipment and vehicles

### **Competency Builders:**

Follow general safety precautions

Adjust throttle for operating conditions

Interpret equipment gauges

Start engine

Shut down engine

Use hand operating signals

Operate manual transmission

Preheat diesels

Secure vehicle when parked

Operate automatic transmission

Use brake systems

Adjust seating and steering

Set out safety markers

Flag extended materials

Operate liftgates

Operate dump beds

Operate winch

Operate snowplow

Operate utility vehicles

Obtain driver's license

Operate aerial lift

Jump-start vehicle

EDU:	12	AD	AC
·	I	P	

Competency: Operate power equipment as required

# **Competency Builders:**

Follow general safety precautions

Use and calibrate equipment/spray equipment

Use rotary tiller

Use edger

Use blower

Use aerator

Use roller

Use mowing equipment

Use trimming equipment

Use lawn sweepers

Use sod cutter

Use chain saw

Use verticutter/turf groomers

Use tractor

Use and calibrate spray equipment

Use power washer

Use straw blowers

Use hand-held augers

Use power tamps

Use skid loader

Use trencher

Use backhoe

Use hydroseeders/mulchers

Use chippers

Use tree spade

Use cutoff saws

Use landscape rake

Use hydraulic tools

EDU:	12	AD	AC
	P	R	

Competency: Clean and store equipment

### **Competency Builders:**

Follow general safety precautions
Remove debris from equipment
Use steam or high-pressure wash equipment
Prepare engines for storage
Lubricate equipment for storage
Drain pumping system

EDU:	12	AD	AC
	I	P	

Competency: Use hand, power, and pneumatic tools

# **Competency Builders:**

Follow general safety precautions
Identify tools needed for job/task
Select tools according to job/task
Set up tools
Adjust tools
Clean tools
Lubricate tools
Recondition tools
Sharpen tools
Store tools

BIL: Recommended

EDU:	12	AD	AC
	I	R	

**Competency:** Apply protective coatings

#### **Competency Builders:**

Follow general safety precautions
Clean surface
Sand surface
Apply masking tape
Thin paint
Mix primer coat
Apply primer coat
Apply wood preservative
Use steam and high-pressure wash equipment
Identify types of coatings
Use environmentally safe preservative

EDU:	12	AD	AC
	I	P	

Competency: Maintain application equipment

# **Competency Builders:**

Follow general safety precautions Lubricate spreader Dispose of waste safely Calibrate spreader Clean blade propeller

BIL: Recommended

EDU:	12	AD	AC
	I	R	

Competency: Weld with gas

#### **Competency Builders:**

Follow general safety precautions
Set up gas welding equipment
Adjust gas welding equipment
Select rod
Apply flux
Cut metal
Weld steel in horizontal positions
Weld steel with filler rod
Braze metal
Clean equipment
Store gas cylinders safely

**BIL:** Recommended

EDU:	12	AD	AC
	I	R	

Competency: Weld with electric arc

#### **Competency Builders:**

Follow general safety precautions
Select welding equipment and accessories
Select electrode sizes and types
Select settings
Prepare metal
Weld steel in non-horizontal positions
Weld steel in horizontal positions
Weld pipe
Cut metal
Store equipment

# **Unit:** Landscape Technology

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Prepare estimate and contracts

#### **Competency Builders:**

List materials required for the project Identify equipment needs Estimate time and man hours Outline costs of materials, equipment, and labor Prepare price for customer based on specifications

EDU:	12	AD	AC
	P		

Competency: Organize the project (landscape and/or interiorscape)

# **Competency Builders:**

Interpret plans and specifications
Identify safety requirements
Organize site preparation
Locate project materials
Outline personnel needs
Outline equipment needs
Outline project schedule

EDU:	12	AD	AC
	I	P	

Competency: Maintain landscapes and equipment

#### **Competency Builders:**

Identify water requirements

Apply water at proper rates

Identify weeds

Apply herbicides safely

Apply fertilization requirements at proper rates

Apply corrective measures to pest, insect, and disease problems

Prune landscape plants

Maintain turf viability (i.e., mow at proper height and frequency, aerate, edge, clip, and remove trash)

Cultivate plants

Remulch plants

Stake trees

Repair landscape plants (e.g., trees, shrubs)

Provide protection for plants from adverse weather conditions

Maintain landscape equipment

Demonstrate procedures for protecting plants from adverse weather

Demonstrate procedures for protecting equipment from adverse weather

EDU:	12	AD.	AC
	I	Р	<del></del>

**Competency:** Maintain customer relations

## **Competency Builders:**

Conduct walk-through of project with client to assure satisfaction Identify current and future maintenance requirements

EDU:	12	AD	AC
	. I	P	

Competency: Maintain landscape tools and equipment

#### **Competency Builders:**

Identify equipment needs for the company
Operate equipment for the job
Demonstrate the service and maintenance of power equipment
Demonstrate the repair and maintenance of facilities
Instruct employees in the safe use of tools and equipment
Demonstrate the safe use of tools and equipment to employees
Develop preventative maintenance program for landscape equipment

# **Unit:** Turf and Landscape Operations

BIL: Essential

EDU:	12	AD	AC
	I	Р	

Competency: Identify plant requirements and value

#### **Competency Builders:**

Identify hardiness zones
Identify landscape value
Identify plant environmental preferences
Identify planting and maintenance levels
Identify environmental value

EDU:	12	AD	AC
·	I	P	

Competency: Identify and classify plants

#### **Competency Builders:**

Classify turf and landscape plants as monocots or dicots

Classify turf and landscape plants as annuals, biennials, or perennials

Identify bulbs

Identify annual flowers

Identify perennial flowers

Identify shade trees

Identify ornamental trees

Identify ornamental grasses

Identify shrubs

Identify ground covers

Identify conifers

Identify plants according to scientific name

Identify environmental plant preferences

Classify plants according to growth habit

Identify wildflowers

Identify herbs

Identify fruit trees

Identify ferns

Identify weeds

Identify turfgrasses

Identify vines

Identify vegetable plants

Identify improved varieties

Identify foliage plants

Identify flowering plants

EDU:	12	AD	AC
	I	Р	

Prepare for installation **Competency:** 

#### **Competency Builders:**

Follow general safety precautions Outline planting depth Outline planting time Interpret seed and bulb tag information Read landscape plan Convert scale to site Identify material quantities Identify underground utilities Plan planting schedules Plan soil erosion controls Prepare seeds for sowing

Match plant requirements to environmental conditions Select seeds and plants

Follow planting rate recommendations

BIL: Recommended

EDU:	12	AD	AC
·	I	R	

Competency: Prepare soil mixes

# **Competency Builders:**

Follow general safety precautions
Identify soil types
Mix materials
Prepare compost
Identify mixing techniques
Identify media materials

EDU:	12	AD	AC
	I	P	

Competency: Prepare planting area

# **Competency Builders:**

Follow general safety precautions
Define areas
Provide rough grade
Create contour
Incorporate soil amendments
Provide finish grade
Apply soil amendments

EDU:	12	AD	AC
	I	P	

Competency: Install turf, landscape, and nursery plants

#### **Competency Builders:**

Follow general safety precautions

Plant seeds

Plant bulbs

Plant shrubs

Plant ground covers

Plant annual and perennial plants

Plant trees

Stake trees

Guy trees

Water in plant material

Lay sod

Apply mulch

Plant drought-resistant and disease-resistant cultivars

Sterilize equipment

Divide plants

Separate plants

Pot trees and shrubs

Transplant seedlings

Identify planted specimens

Perform initial waterings

EDU:	12	AD	AC
	I	Р	

**Competency:** Fertilize plants

#### **Competency Builders:**

Follow general safety precautions Interpret manufacturer's fertilization rate charts Interpret fertilizer labels Identify application methods Calibrate fertilizer application equipment Mix fertilizer solutions Apply liquid fertilizer Apply dry fertilizer Identify application pattern Identify nutrient requirements Identify symptoms of nutrient deficiency Identify kind and amount of fertilizer and soil amendments to apply Select application method Use fertilizer injectors Use organic fertilizers Use polymers Maintain fertilizer records

EDU:	12	AD	AC
	I	P	

Competency: Maintain plants

#### **Competency Builders:**

Follow general safety precautions

Pinch plants

Cultivate plants

Water plants

Apply mulches

Prune trees

Prune shrubs

Transplant bulbs, corms, and tubers

Treat tree wounds

Remove fallen leaves

Remove old flowers

Apply growth-regulating compounds

Maintain plants on arbors and trellises

Compost plant debris

Use growth regulators

Disbud flowering plants

Thin plants, seedlings, and cuttings

Space plants

Repot plants

Stake trees

Guy trees

Climatize plants

Weed fields

Check for insect and disease problems

Weed planting beds

EDU:	12	AD	AC
	I	Р	

Competency: Maintain turfgrasses

### **Competency Builders:**

Follow general safety precautions Apply top dressing to turfgrass areas Verticut turf Overseed turf

Water turf

Arify turf

Renovate turf

Fill in holes and depressions in turf

Relocate holes and tee markers

Slit seed turf

Mow turf

String trim turf

Edge turf

Apply growth regulators

Compost clippings

EDU:	12	AD	AC
	I	P	

Competency: Prune plants

### **Competency Builders:**

Follow general safety precautions
Identify pruning tools
Sterilize pruning equipment
Identify pruning time
Identify structural problems
Identify lowest branch height
Outline desired shape
Identify water sprouts
Space branches
Select scaffold branches
Prune shrubs
Root prune
Train central leaders

**Unit:** Nursery Production Management

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Identify plant requirements and value

### **Competency Builders:**

Identify hardiness zones
Identify landscape value
Identify plant environmental preferences
Identify planting and maintenance levels
Identify environmental value

EDU:	12	AD.	AC
	I	P	

Competency: Identify and classify plants

#### **Competency Builders:**

Classify turf and landscape plants as monocots or dicots

Classify turf and landscape plants as annuals, biennials, or perennials

Identify bulbs

Identify annual flowers

Identify perennial flowers

Identify shade trees

Identify ornamental trees

Identify ornamental grasses

Identify shrubs

Identify ground covers

Identify conifers

Identify plants according to scientific name

Identify environmental plant preferences

Classify plants according to growth habit

Identify wildflowers

Identify herbs

Identify fruit trees

Identify ferns

Identify ferns

Identify weeds

Identify vines

Identify improved varieties

Identify foliage plants

Identify flowering potted plants

EDU:	12	AD	AC
	P	R	

Competency: Prepare for planting and propoagation

#### **Competency Builders:**

Follow general safety precautions
Outline planting rates
Outline planting depth
Outline planting time
Interpret seed and bulb tag information
Prepare seeds for sowing
Match plant requirements to environmental conditions
Select seeds, plants, and cuttings
Sterilize equipment and containers
Follow planting rate recommendations

EDU:	12	AD	AC
	P	R	

Competency: Prepare media mixes

# **Competency Builders:**

Follow general safety precautions
Identify soil types
Mix media materials
Prepare compost
Identify mixing techniques
Identify media materials

EDU:	12	AD	AC
·	I	P	

Competency: Prepare planting area

# **Competency Builders:**

Follow general safety precautions Incorporate soil amendments Apply soil amendments Identify surface drainage areas

EDU:	12	AD	AC
	P	R	

Competency: Prepare for planting

#### **Competency Builders:**

Follow general safety precautions

Plant seeds

Plant bulbs

Plant shrubs

Plant ground covers

Plant annual and perennial plants

Plant trees

Stake trees

Water in plant materials

Apply cover crops as needed

Plant drought-resistant and disease-resistant cultivars

Take cuttings

Sterilize equipment

Divide plants

Separate plants

Perform grafts and bulbs

Pot trees and shrubs

Transplant cuttings and seedlings

Apply rooting hormone

Identify planted specimens

Perform initial waterings

EDU:	12	AD	AC
	I	Р	

**Competency:** Fertilize plants

#### **Competency Builders:**

Follow general safety precautions Interpret manufacturer's fertilization rate charts Interpret fertilizer labels Identify application methods Calibrate fertilizer application equipment Mix fertilizer solutions Apply liquid fertilizer Apply dry fertilizer Identify application pattern Identify nutrient requirements Identify symptoms of nutrient deficiency Identify kind and amount of fertilizer and soil amendments to apply Select application method Use fertilizer injectors Use organic fertilizers Use polymers Maintain fertilizer records

EDU:	12	AD	AC

Follow general safety precautions

Pinch plants

Cultivate plants

Water plants

Apply mulches

Prune trees

Prune shrubs

Transplant bulbs, corms, and tubers

Treat tree wounds

Remove fallen leaves

Remove old flowers

Apply growth-regulating compounds

Maintain plants on arbors and trellises

Compost plant debris

Use growth regulators

Disbud flowering plants

Thin plants, seedlings, and cuttings

Space plants

Repot plants

Wrap trees

Stake trees

Guy trees

Climatize plants

Weed fields

Check for insect and disease problems

Weed planting beds

EDU:	12	AD	AC
	I	P	

Competency: Prune plants

#### **Competency Builders:**

Follow general safety precautions
Identify pruning tools
Sterilize pruning equipment
Identify pruning time
Identify structural problems
Identify lowest branch height
Outline desired shape
Identify water sprouts
Space branches
Select scaffold branches
Prune shrubs
Root prune
Train central leaders

EDU:	12	AD	AC
	Р	R	

Competency: Harvest plants

#### **Competency Builders:**

Follow general safety precautions

Package plants

Label plants

Clean plants

Acclimate plants

Grade plants

Preserve plant viability

Apply antidesiccants

Wrap tree head

Dig shrubs and trees

Ball shrubs and trees

Burlap shrubs and trees

Harvest bare root stock

Comply with regulations regarding plant inspection and movement

Apply American Association of Nurserymen (AAN) sizing/grading standards

Unit: Irrigation

BIL:

Essential

EDU:	12	AD	AC
	I	P	

**Competency:** 

Maintain water delivery systems

#### **Competency Builders:**

Identify types of pipe, pipe fittings, insulation, and plumbing fixtures Open trench line

Locate existing underground water lines

Cut and fit pipe or tubing (e.g., PVC, aluminum)

Tap into existing waterlines

Install pipe and pipe fittings

Install valves and faucets

Install filters

Test sprinkler spray patterns

Adjust sprinkler spray patterns

Backfill trenches

Replace gaskets

Unclog pipes

Install flow-control devices

Winterize water delivery systems

Maintain filter system

Install insulation

Maintain automatic waterers

Install sprinkler heads and mist heads

Repair lines and nozzles on spray equipment

Repair broken pipes, sprinkler heads, mist heads, valves, and faucets

Thread metal pipe

Troubleshoot automatic sprinkler system

Repair automatic sprinkler system

EDU:	12	AD	AC
	I	Р	

**Competency:** Operate irrigation system

#### **Competency Builders:**

Follow general safety precautions
Determine sprinkler precipitation rate
Adjust sprinkler patterns
Adjust water pressure
Program automatic timers
Hand water plants
Calibrate injection systems
Monitor injection systems
Winterize systems

**Unit:** Landscape Design

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Conduct site analysis

#### **Competency Builders:**

Identify soil types
Identify rock outcroppings
Identify water sources
Identify existing vegetation
Identify existing structures
Identify direction (North, South, East, West)
Identify climate of site
Identify location of utilities
Identify legal aspects of site, right of ways
Identify circulation routes
Cite unfavorable and favorable views
Cite location of pedestrian traffic
Cite noise sources
Cite dust sources
Cite sources of bright light

Evaluate equipment accessibility

EDU:	12	AD	AC
·	I	P	·

Competency: Analyze customer needs

#### **Competency Builders:**

Identify general entertaining preferences
Identify sports areas
Identify cooking needs, indoor and/or outdoor
Identify gardening and/or bird watching preferences
Identify pet needs
Identify storage needs
Identify laundry needs
Identify cost parameters for project
Identify family needs (e.g., children, plant preferences, colors)

EDU:	12	AD	AC
	P	R	

**Competency:** Perform area layout

Competency Builders: Layout public area Layout private/outdoor living area Layout service/utility area

EDU:	12	AD	AC
	I	P	

Competency: Apply principles of design

## **Competency Builders:**

Use principle of simplicity

Use principle of contrast

Use principle of transition

Use principle of radiation

Use principle of scale

Use principle of rhythm

Use principle of balance (symmetry, asymmetry)

Use principle of unity

Use principle of harmony

Use principle of focus

EDU:	12	AD	AC
	I	P	

Competency: Apply elements of design

# **Competency Builders:**

Use element of texture
Use element of color
Use element of form
Use element of size and mass
Use element of line and direction
Use element of space
Use element of shadow

EDU:	12	AD	AC
	I	Р	

Competency: Describe how plants are used in design

## **Competency Builders:**

Describe plants used as shade and/or as climate control

Describe plants used as enframement

Describe plants used as background

Describe plants used as boundary or border

Describe plants used as screens

Describe plants used as accents

Describe plants used as softening architectural lines or features

Describe plants used as specimen plants

Describe plants used as foundation plantings

Describe plants used as ground cover plantings

Describe plants used as espalier plantings

Describe plants used in muffling noise

Describe plants used in attracting wildlife

Describe plants used in the creation of illusion of space, size, and distance

Describe plants used in direction of traffic

Describe plants used as fruit, flower, fragrance

EDU:	12	AD.	AC
		Р	

Competency: Correlate architecture with landscape design

#### **Competency Builders:**

Identify types of landscape design suitable for Colonial architecture Identify types of landscape design suitable for European architecture Identify types of landscape design suitable for Oriental architecture Identify types of landscape design suitable for Contemporary architecutre

EDU:	12	AD	AC
	I	P	

Competency: Plan transport structures

# **Competency Builders:**

Plan walks
Plan driveways
Plan steps
Plan decks and patios
Plan handicap accessibility

99

Essential **BIL:** 

EDU:	12	AD	AC
	I	P	

**Competency:** Plan retention structures

# **Competency Builders:** Plan fences and walls

Plan miscellaneous structures (e.g., gazebos, lawn statuary)

EDU:	12	AD	AC
	I	P	

Competency: Describe use of structural materials

#### **Competency Builders:**

Describe advantages and disadvantages of using asphalt
Describe advantages and disadvantages of using concrete
Describe advantages and disadvantages of using brick
Describe advantages and disadvantages of using flagstone
Describe advantages and disadvantages of using field stone
Describe advantages and disadvantages of using loose aggregates
Describe advantages and disadvantages of using wood
Describe advantages and disadvantages of using tanbark and wood chips

EDU:	12	AD	AC
	I	P	

Competency: Identify plant considerations

#### **Competency Builders:**

Describe habits of growth of various plants

Describe hardiness of various plants

Describe maintenance of various plants

Describe fruit, flower, foliage, and branching characteristics of various plants

Differentiate evergreen and deciduous plants

Describe advantages and disadvantages of various trees, shrubs, ground covers, espaliers, and vines

Describe color coordination

Describe use of bedding plants and ground covers

EDU:	12	AD	AC
	I	Р	

Competency: Address problem areas of landscape design

## **Competency Builders:**

Address slopes and erosion control
Address harsh exposure
Address poor drainage
Address cuts
Address fills
Address compaction
Address retention of existing vegetation

EDU:	12	AD	AC
	I	Р	

Competency: Design special types of gardens

# **Competency Builders:**

Design rock gardens
Design Japanese gardens
Design formal gardens
Design informal gardens
Design perennial gardens
Design shade and forest gardens

EDU:	12	AD	AC
	I	P	

Competency: Design around focal point(s)

#### **Competency Builders:**

Design around ponds, basins, pools, waterfalls, and fountains Place outdoor lighting properly to enhance focal point(s) Place irrigation system properly to enhance focal point(s) Install sod and lawn around focal point(s)

EDU:	12	AD	AC
	I	Р	

Competency: Apply landscape grading techniques

# **Competency Builders:**

Interpret prints and specifications
Locate utilities
Build topographic features

EDU:	12	AD	AC
	I	P	

Competency: Install plant materials

#### **Competency Builders:**

Fertilize as required

Interpret prints and specifications
Install trees
Install shrubs
Install ground covers, annuals, or perennials
Provide for weed control
Apply mulches (e.g., plastic, organic, fiberglass)
Apply herbicides
Provide for erosion control
Edge beds
Outline costs and labor for installation
Water as required

EDU:	12	AD	AC
•.	. I	P	

Competency: Explain use of various construction materials

#### **Competency Builders:**

Describe uses and costs of lumber in landscape design
Describe uses and costs of railroad ties in landscape design
Describe uses and costs of brick in landscape design
Describe uses and costs of stone and flagstone in landscape design
Describe uses and costs of gravel in landscape design
Describe uses and costs of plastic and fiberglass in landscape design
Describe uses and costs of concrete in landscape design
Describe uses and costs of metal in landscape design
Describe uses and costs of sand in landscape design
Describe uses and costs of sand in landscape design
Describe uses and costs of sand in landscape design

EDU:	12	AD	AC
	I	P	

Competency: Construct garden surfaces

## **Competency Builders:**

Construct garden paths and walks Construct patios and terraces Construct steps Construct foot bridges

Identify costs of labor and materials involved in constructing garden surfaces

EDU:	12	AD	AC
	I	P	

Competency: Construct landscape enclosures

## **Competency Builders:**

Construct raised beds

Construct retaining walls and free standing walls

Construct fences, screens, and gates

Construct trellis

Identify costs of labor and materials involved in constructing enclosures

Construct other structures

EDU:	12	AD	AC
	I	R	

**Competency:** Install electrical landscape features

# **Competency Builders:**

Install outdoor lighting
Install submersible pumps
Install timers and valves
Follow electrical contractor's code
Identify costs of labor and materials involved in installing electrical features

EDU:	12	AD	AC
	I	R	

**Competency:** Construct water features

# **Competency Builders:**

Construct pools

Construct fountains

Construct waterfalls

Construct creek beds

Identify costs of labor and materials involved in constructing water features

EDU:	12	AD	AC
,	I	R	

Competency: Construct irrigation and drainage systems

#### **Competency Builders:**

Apply knowledge of pressure and flow

Apply knowledge of pipes, nozzles, and valves

Apply knowledge of trenching

Install tile

Install sumps and drains

Identify costs of labor and materials involved in constructing irrigation and drainage systems and site reclamation

Compare sprinkler, bubbler and drip irrigation systems

EDU:	12	AD	AC
	I	P	

Competency: Maintain customer relations

# **Competency Builders:**

Conduct walk-through of project with client to assure satisfaction Identify current and future maintenance requirements

**Unit:** Drafting Technology

BIL:

Essential

EDU:	12	AD	AC
	I	P	

**Competency:** 

Apply basic drafting skills

#### **Competency Builders:**

Use drafting equipment, measuring scales, drawing media, drafting instruments and consumable materials, blueprint machine

Identify line styles and line weights

Select proper drawing scale, introduction to different types

Prepare title blocks and other drafting formats

Apply forehand and other lettering techniques

Prepare multi-view drawings

Prepare multi-view sketches

Prepare orthographic views

Prepare change control block

Describe change control block/revision block

Measure angles

Draw horizontal, vertical, angular, parallel, and perpendicular lines

Transfer an angle

Control tangent lines (to arcs) and tangent arcs (to arcs)

Bisect lines, angles, and arcs

Divide lines

Construct three-point circle

Construct regular hexagon, pentagon, and octagon

Reproduce a drawing

Prepare single-view drawings

Prepare dimension drawings

Interpret notes and dimensions to determine part

Draw arcs, circles, and conics

Transfer measurements

EDU:	12	AD	AC
	I	P	

Competency: Apply intermediate drafting skill

#### **Competency Builders:**

Describe types of diazo and their applications
Apply isometric, oblique and perspective sketching techniques
Prepare isometric, oblique and perspective sketches
Prepare sectional views
Prepare auxiliary views
Identify landscape symbols
Apply systems drafting techniques
Identify a materials list
Describe purpose of auxiliary and sectional views

EDU:	12	AD	AC
·		I	

Competency: Apply advanced drafting skills

# **Competency Builders:**

Interpret reports and specifications Prepare pictorial drawings Prepare schematics

EDU:	12	AD	AC
	I	P	

**Competency:** Interpret prints

# **Competency Builders:**

Visualize object from drawing Interpret sectional views Interpret dimensions Interpret tolerances Interpret special symbols Interpret schematics

EDU:	12	AD	AC
	I	R	

**Competency:** Convert dimensions and tolerances

## **Competency Builders:**

Convert dimensions and tolerances from English units to metric units Convert dimensions and tolerances from metric units to English units

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate dimensioning techniques

#### **Competency Builders:**

Construct arrowheads using various styles/discipliens

Apply symbols for surface and texture control

Add labels/notes to drawing

Interpret decimal tolerance dimensions

Dimension arcs

Dimension angles

Dimension curves

Dimension rounded-end shapes

Dimension spherical objects

Dimension cylindrical objects

Dimension cones, pyramids, and prisms

Dimension features on circular center line

Dimension theoretical point of intersection

Dimension object using rectangular coordinate system

Dimension object using polar coordinate system

Dimension object using tabular coordinate system

Dimension object using ordinate dimensioning system

# **Unit:** Computer Aided Design (CAD) Fundamentals

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Operate a CAD system

#### **Competency Builders:**

Execute CAD system

Use keyboard input

Use screen and pull down menus

Use other input devices (e.g., scanner, digitizer)

Create scaled plots

Operate a pen plotter

Operate a printer-plotter (e.g., laser plotter)

Access online help for commands

Use file conversion

Use data transfer

EDU:	12	AD.	AC
	I	P	

**Competency:** Select entities for action

# **Competency Builders:**

Add or remove entities separately
Add or remove entities using a window
Select entities using a fence
Select entities by other methods (e.g., last, previous, type, all, etc.)

EDU:	12	AD	AC
	I	P	

**Competency:** Control display

# **Competency Builders:**

Apply view control while drawing (e.g., zoom and pan)
Control view resolution (e.g., viewers)
Save views
Display views

EDU:	12	AD	AC
	I	P	

Competency: Extract basic entity and drawing information

# **Competency Builders:**

Measure distances
Measure areas
Identify coordinates
List entity characteristics (e.g., length, size, location, properties, etc.)

Unit: Arboriculture

BIL: Essential

EDU:	12	AD	AC
	P	R	

Competency: Demonstrate knowledge of tree biology

## **Competency Builders:**

Identify tree anatomy and physiology Identify tree structure and function Identify tree taxonomy Use scientific nomenclature Identify plant characteristics Describe principles of identification

EDU:	12	AD	AC
	I	P	

Competency: Describe tree, soil, and water relationships

## **Competency Builders:**

Identify soil properties

Explain root growth

Describe water movement and retention

Describe water management

Describe tree nutrition and fertilization mineral requirements

EDU:	12	AD	AC
	P	R	

**Competency:** Demonstrate knowledge of tree selection

# **Competency Builders:**

Match tree and planting site
Describe installation
Explain planting and transplanting
Describe care after planting/transplanting

EDU:	12	AD	AC
	I	Р	

Competency: Transplant large trees and shrubs

## **Competency Builders:**

Water trees

Differentiate deciduous trees and shrubs
Differentiate needled, conifer, and broadleaf evergreen trees and shrubs
Describe tree and shrub growth requirements
Identify tree root systems
Harvest ball and burlap
Harvest bare root trees
Prepare holes for transplanting
Plant trees
Stake trees

BIL:

Essential

Not applicable for NT

EDU:	12	AD	AC
·	I	P	

**Competency:** 

Prune mature trees and shrubs

#### **Competency Builders:**

Remove pruned materials

Dispose of pruned materials

Describe effect of tree growth habits on pruning operations

Differentiate pruning time for broadleaf evergreens and conifers, and deciduous shrubs

Use climbing equipment safely

Handle ladders

Use power wood chipper safely

Climb trees

Use aerial lift equipment safely

Select appropriate pruning equipment

Use hand pruning tools (e.g., saws, shears)

Operate saws and power shears safely

Operate hydraulic equipment

EDU:	12	AD	AC
	P	R	·

Competency: Explain pruning principles and techniques

#### **Competency Builders:**

Identify pruning cuts: CODIT (compartmentalization of decay in trees)

Explain central leader system

Explain open center system

Explain modified leader system

Explain espaliering

Explain topiary

Explain thinning

Explain heading back

Explain shearing

Explain root prune

EDU:	12	AD	AC
	P	R	

Competency: Maintain basic hand pruning tools and equipment

## **Competency Builders:**

Sharpen pruning tools and equipment Adjust pruning tools and equipment Lubricate pruning tools and equipment Store pruning tools and equipment Sterilize pruning tools

**BIL:** 

Essential

Not applicable for NT

EDU:	12	AD	AC
	Ι.	Р	

**Competency:** 

Work in the tree

## **Competency Builders:**

Demonstrate safe climbing techniques
Demonstrate cabling and bracing
Install lightning protection
Use basic rigging systems
Safely cull trees and shrubs
Shape trees and shrubs
Repair trees and shrubs
Safely use ropes and knots

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate diagnostic procedure for plant problems

## **Competency Builders:**

Describe the diagnostic process
Explain tree stress and the "healthy" tree
Identify common insects and diseases
Describe physiological disorders and injuries
Describe prevention treatment and continued plant health care
Demonstrate methods of applying fertilizer to trees and shrubs
Identify abiotic problems (e.g., weedeater, mechanical, paving damage)

EDU:	12	AD	AC
·	I	Р	

Competency: Identify tree and shrub pests

### **Competency Builders:**

Differentiate chewing, sucking, boring, and rasping insects
Differentiate bacterial, viral, and fungal diseases
Explain preventative measures to protect trees and shrubs from injuries

Not applicable for NT

EDU:	12	AD	AC
	I	P	

Competency: Manage pests in mature trees and shrubs

## **Competency Builders:**

Select the proper pesticide
Identify coverage and coverage requirements
Prepare pesticide solutions
Adjust sprayers
Operate sprayers
Spray prescribed area safely
Clean sprayers
Repair sprayers

EDU:	12	AD	AC
	I	P	

**Competency:** Evaluate trees

## **Competency Builders:**

Identify nutritional deficiencies
Prevent injury to trees and shrubs
Recognize mechanical injury
Recognize damage caused by rodents and deer
Recognize water injury
Recognize hazardous trees

**BIL:** 

Essential

Not applicable for NT

EDU:	12	AD	AC
·	I	Р	

**Competency:** 

Remove trees

## **Competency Builders:**

Fell trees
Prepare area for safety
Prepare drop area
Select proper equipment
Apply safety procedures
Make primary notch cut
Make final cut
Buck limbs
Demonstrate ropes/knots/rigging

Not applicable for NT

EDU:	12	AD	AC
	I	P	

Competency: Repair mature plant material

**Competency Builders:** 

Support limbs
Brace limbs
Clean cavities and splits
Treat cavities and splits

Not applicable for NT

EDU:	12	AD	AC
	I	P	

Competency: Describe the arborist's legal responsibilities

**Competency Builders:** 

Explain pesticide liability Explain property liability

**Unit:** Landscape Construction

**BIL:** Essential

EDU:	12	AD	AC
	I	P	

**Competency:** Install the project landscape

#### **Competency Builders:**

Locate existing utilities

Rough grade the site

Outline procedures for installing large materials

Install irrigation system

Describe procedures for constructing hardscape (e.g., walls, walks, patio, drives)

Lay out plants

Install plants (i.e., remove labels, fertilizer application)

Prepare final grade

Install lawns and turfs

Install mulch

Water as required

Perform final cleanup (tool search)

EDU:	12	AD	AC
	I	P	

Competency: Install a drainage system

### **Competency Builders:**

Identify the natural slope/grade of an area
Identify the texture and percolation characteristics of the soil
Identify techniques for constructing ditches and culverts
Direct the movement of water away from structures and installations
Plan the construction of an underground drainage system
Order appropriate fill materials
Identify proper elevations for a landscape site
Grade a landscape site
Read soils and contour maps

EDU:	12	AD	AC
	I	Р	

Competency: Install an irrigation system

## **Competency Builders:**

Identify irrigation requirements
Assess quality of irrigation water
Plan an irrigation system
Supervise the installation of irrigation equipment
Service electric and engine driven pumps
Operate a low-volume irrigation system
Operate an overhead irrigation system
Operate an automatic irrigation system
Calculate cost efficiency of an irrigation system

**BIL:** Recommended

EDU:	12	AD	AC
		I	

**Competency: Construct with concrete** 

## **Competency Builders:**

Lay brick

Install concrete edging Use power concrete tools

Follow general safety precautions Select hand concrete tools Use hand concrete tools Excavate structure sites for concrete pouring Install concrete reinforcement Build concrete forms Remove concrete forms Mix and pour concrete Cure concrete Use survey level Select concrete materials and additives Calculate volume of concrete to order or mix Finish concrete surface Lay block

Essential **BIL:** 

EDU:	12	AD	AC
		P	

Competency: Construct with stone and pavers

## **Competency Builders:**

Follow general safety precautions Excavate for foundation Apply aggregates Compact aggregates Grade sand using screen Install edging Lay pavers Lay gravel Select stone Face stone Set landscape stones Lay stone

Construct wall Operate cutting saws/tools Install drainage behind walls

EDU:	12	AD	AC
		P	

Competency: Construct with wood

## **Competency Builders:**

Follow general safety precautions
Cut lumber to dimension
Cut and fit joints
Select and use metal fasteners
Assemble joints with glue
Cut and set timber and poles
Install bracing
Repair bracing
Install siding
Repair siding
Select types of wood
Identify use of recycled materials

BIL: Recommended

EDU:	12	AD	AC
		I	

Competency: Plan electrical installations

## **Competency Builders:**

Follow general safety precautions
Follow electrical codes
Identify electrical needs
Plan distribution system
Plan wiring layouts
Select wire and electrical supplies
Identify alternative electrical sources

EDU:	12	AD	AC
		Р	

Competency: Maintain electrical systems

## **Competency Builders:**

Follow general safety precautions
Repair extension cords
Install low-voltage lighting fixtures
Replace or reset circuit breakers and fuses
Install outlets and switches
Install electric motors
Repair outdoor wiring
Splice outdoor wiring
Lubricate motors
Install computerized components

EDU:	12	AD	AC
		Р	

Competency: Maintain fencing

### **Competency Builders:**

Follow general safety precautions
Lay out fence
Install posts and braces
Install fasteners
Identify options in fencing systems
Identify amount of fence required
Select fencing materials
Select posts and braces
Select fasteners
Install gates
Identify use of recycled materials (e.g., plastics)

**Unit:** Golf Course Operations

**BIL:** Essential

EDU:	12	AD	AC
	I	P	

**Competency:** Differentiate golf course types

## **Competency Builders:**

Classify golf courses by ownership Classify golf courses by clientele Classify golf courses by length and layout Classify golf courses by management structure

EDU:	12	AD	AC
	I	P	

**Competency:** 

Demonstrate knowledge of golf course design and

construction

#### **Competency Builders:**

Identify objective of the construction

Explain cost analysis and financing

Explain the role of the architect

Describe form and function of features

Relate golf course design to length, difficulty of play, flexibility, speed of play, ease of maintenance, safety, use of land

Demonstrate knowledge of installation, irrigation, and drainage

Demonstrate turfgrass establishment

Describe putting green construction according to USGA specifications

Compare other means of putting green construction

Describe water hazards

Describe bunker construction

Describe lateral water hazards

Describe cart path construction

Explain the length of golf holes and golf courses

Explain the rating of golf holes by par

EDU:	12	AD	AC
	I	Р	

Competency: Explain chemical programming

## **Competency Builders:**

Describe fertilizer and pest control programs
Describe reasons for product selection
Explain purchasing
Use application equipment

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate knowledge of capital equipment

## **Competency Builders:**

Define inventory, valuation, and depreciation
Identify items needing replacement
Select appropriate equipment
Explain purchasing vs. renting or leasing
Explain how budgets cover capital items
Explain importance of preventative maintenance

EDU:	12	AD	AC
	I	P	

Competency: Prepare annual budget

# **Competency Builders:**

Collect information
Interpret last year's records
Put budget on paper
Sell the budget
Follow the budget

EDU:	12	AD	AC
	I	Р	

Competency: Irrigate plants and turfs

## **Competency Builders:**

Identify water needs of plants

Identify irrigation components and types of systems

Identify sources of water for irrigation

Install irrigation systems with control valves and clocks

Identify drainage components for different types of drainage systems

Install drainage systems

Repair irrigation systems

Identify soil structures to determine proper irrigation and drainage systems (e.g., topsoil, subsoil)

EDU:	12	AD	AC
	I	P	

Competency: Explain the ground rules of golf course maintenance

#### **Competency Builders:**

Describe the marking of the course (e.g., lengths, out-of-bounds, hazards, grounds under repair)

Demonstrate the setting of cups and tees

Identify appropriate mowing heights

Demonstrate bunker maintenance

Explain the special needs associated with tournaments, outings, and contests

Explain rules of golf

**Unit:** Turfgrass Management for Golf Courses

BIL: Essential

EDU:	12	AD	AC
	I	P	

Competency: Establish golf course turf

### **Competency Builders:**

Select proper turfgrass species and cultivar for various locations (e.g., cool vs. warm season, greens, tees, fairways, roughs, maintenance budget, availability, species and cultivar features)

Acquire materials

Measure site area

Determine material application rate

Calculate amount of material needed

Explain interseeding and overseeding

Prepare the site

Clear the site

Rough grade the site

Contour the site

Fertilize the site

Plant turf (e.g., seeding, sodding, plugging)

Calibrate application equipment

Demonstrate sprigging, seeding, sodding, and plugging

EDU:	12	AD	AC
	I	P	

Competency: Mow golf course turf

## **Competency Builders:**

Explain mowing needs of turf

Explain differences and pros and cons of reel mowers vs. rotary mowers

Demonstrate rotary mower operation and adjustment

Demonstrate reel mower operation and adjustment

Develop a golf course mowing schedule, given equipment and manpower resources and hours of operation

Maintain reels

EDU:	12	AD	AC
	I	P	

Competency: Irrigate golf course turf

## **Competency Builders:**

Explain turfgrass water needs
Program sprinkler controller to achieve turfgrass water needs
Demonstrate hand watering of turf
Determine need for irrigation by observing turf and soil

EDU:	12	AD	AC
	I	P	

**Competency:** Fertilize golf course turf

## **Competency Builders:**

Demonstrate sampling for a soil test
Evaluate soil test results
Explain types of fertilizers and their composition
Develop a fertilization plan, given performance needs
Develop a fertilization plan, given budget
Develop a fertilization plan, given type of turfgrass variety
Calibrate fertilization equipment
Apply fertilizer to turf areas

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate types of turfgrass cultivation

### **Competency Builders:**

Demonstrate aerification

Explain pros and cons of hollow tine aerification

Explain pros and cons of solid tine aerification

Demonstrate high pressure water aerification

Explain pros and cons of high pressure water aerification

Demonstrate spiking/slicing

Explain pros and cons of spiking/slicing

Demonstrate deep tine aerification (Vertidrain)

Explain pros and cons of deep tine aerification (Vertidrain)

Demonstrate vertical mowing

Explain pros and cons of vertical mowing

Demonstrate grooming

Explain pros and cons of grooming

Demonstrate rolling

Explain pros and cons of rolling

List methods for topdressing

List advantages to different methods for topdressing

Demonstrate topdressing

Explain pros and cons of topdressing

Demonstrate brushing

Explain pros and cons of brushing

EDU:	12	AD	AC
	. I	Р	

**Competency:** Control pests

### **Competency Builders:**

Identify common turfgrass insect pests and their damage

Explain cultural control methods of common turfgrass insect pests and their damage

List common chemical control for common turfgrass insect pests and their damage Identify common turfgrass disease pests and their damage

Explain cultural control methods for common turfgrass disease pests and their damage

List common chemical controls for common turfgrass disease pests and their damage

Apply fundamentals of IPM

Identify common turfgrass weed pests

Explain cultural control methods of common turfgrass weed pests

List common chemical controls for common turfgrass weed pests

**Unit:** Nursery Operations

**BIL:** Essential

EDU:	12	AD	AC
·	I	P	

Competency: Propagate nursery stock

#### **Competency Builders:**

Collect propagation materials (e.g., seeds, cuttings, scions, bulbs) at proper time Demonstrate propagation by grafting, budding, layering, separating, dividing, cutting, and tissue culturing

Prepare flats and a seedbed

Plant seeds

Prepare a rooting bed

Prepare propagation materials (e.g., seeds, cuttings, scions) for planting

Apply growth stimulants to propagation materials

Control propagation facility environment (e.g., moisture, temperature, light, pH and fertilization of field grown material)

Transplant rooted propagation materials, including tissue culture transplants Demonstrate sanitation and safety practices

EDU:	12	AD	AC
	I	P	

Competency: Market nursery stock

Describe care and use of plants to customers

## **Competency Builders:**

Label plants for sale

Maintain clean and attractive merchandising and display areas
Use various advertising methods to promote sales
Take telephone orders
Use sales catalog
Greet customers

EDU:	12	AD	AC
	I	Р	_

Competency: Perform field and container planting and maintenance

#### **Competency Builders:**

Manage material in cold storage

Use cover crops

Describe elements of soil preparation in the field (e.g., drainage, pH, nutrient levels)

Design field layout and spacing, including irrigation systems and erosion control

Maintain field nursery (e.g., mowing, weed control, pruning, spraying, fertilizing)

Demonstrate sanitation and safety practices

Prune nursery stock

Shape nursery stock

Prune plants to achieve desired growth

Select chemical growth regulators

Use chemical growth regulators

Root-prune nursery plants and trees

Identify techniques for pruning specialty items (e.g., topiary, espalier, bonsai)

EDU:	12	AD	AC
	I	Р	

Competency: Perform field harvesting

## **Competency Builders:**

Use specialized digging equipment
Perform hand digging, ball and burlap
Perform bare root digging
Determine care of ball and burlap and bare root plants before planting
Identify proper loading and shipping techniques

EDU:	12	AD	AC
	P	R	

Competency: Demonstrate agronomy knowledge

## **Competency Builders:**

Identify soil types and the properties of each Explain soil amendments and how they are used (e.g., peat, sand, clay, compost) Demonstrate how irrigation and drainage systems affect soil and plant health

EDU:	12	AD	AC
·	. I	P	

Competency: Irrigate plants

## **Competency Builders:**

Identify various types of irrigation components and systems
Use various types of irrigation components and systems
Set up irrigation system for propagation area
Set up irrigation system for greenhouse or enclosed structure
Set up irrigation system for shadehouse
Set up irrigation system for retail display area
Set up irrigation system for field growing area

EDU:	12	AD	AC
	I	Р	

Competency: Prepare growing media and seeds

## **Competency Builders:**

Prepare rooting and growing media according to plant requirements Sterilize rooting, potting, and growing media

Collect and test a soil sample from field and potting media

Adjust pH and nutritional levels of media

Prepare planting beds and sites

Fill benches and pots with media

Level benches and pots with media

Demonstrate sanitation practices when handling and storing plant media materials

Construct drainage ditches in field growing area

Repair drainage ditches in field growing area

EDU:	12	AD	AC
	I	P	

Competency: Propagate plant materials

#### **Competency Builders:**

Collect propagation materials (e.g., seeds, cuttings, scions, bulbs) at proper time Demonstrate propagation by grafting, budding, separating, dividing, cutting Explain layering and tissue culture

Prepare flats and seedbeds

Plant seeds

Prepare a rooting bed

Prepare propagation materials (e.g., seeds, cuttings) for planting

Apply growth stimulants to propagation materials

Control propagation facility environment (e.g., moisture, temperature, light)

Transplant rooted propagation materials, including tissue culture transplants

Demonstrate sanitation and safety practices when propagating

Identify proper tools and their maintenance (e.g., sterilization)

EDU:	12	AD	AC
	I	P	

Competency: Control plant growth by cultural, environmental, and chemical methods

# **Competency Builders:**

Disbud flowering plants
Apply growth-regulating chemicals
Apply shading compound to greenhouse structure
Prune plants to achieve desired growth

EDU:	12	AD	AC
	I	P	

**Competency:** Irrigate plants

#### **Competency Builders:**

Identify water needs of plants
Identify irrigation components and types of systems
Identify sources of water for irrigation
Install irrigation systems with control valves and clocks
Repair irrigation systems
Identify soil structures to determine proper irrigation and drainage systems (e.g., topsoil, subsoil)

Unit: Floral Design

**BIL:** Essential

EDU:	12	AD	AC
	P	R	

Competency: Explain the use of value as it relates to floral design

#### **Competency Builders:**

Describe the number of flowers used in a \$25.00 arrangement

Explain the concept of over-stuffing an arrangement and the consequence to the business

Describe how to arrive at proper value for an arrangement

BIL: Recommended

EDU:	12	AD	AC
	I	P	

Competency: Explain the use of color as it relates to floral design

## **Competency Builders:**

Describe monochromatic color as it relates to floral design

Describe analogous color as it relates to floral design

Describe complementary and split complementary as it relates to floral design

Describe triadic color scheme as it relates to floral design

Describe color as it relates to interior design (e.g., floral shop, customers' homes, and businesses)

Mix colors (e.g., to create a color to match an accessory)

Describe colors to go with situations (e.g., baby boy - blue, baby girl - pink)

Describe color principles and use of color wheel

EDU:	12	AD	AC
	P	R	

Competency: Demonstrate care and handling of flowers and greens

#### **Competency Builders:**

Follow general safety precautions
Explain importance of bucket and tool cleanliness and disinfection
Identify temperature needs
Use proper cutting technique
Mix preservatives and treatments
Strip foliage
Separate flower varieties and color
Identify ethylene sources (e.g., fruits)
Identify preservatives and treatments
Select preservatives and treatments
Identify major cut flowers and decorative foliage
Explain the correct procedure for unpacking and storing cut flowers
Differentiate non-saleable and healthy flowers

EDU:	12	AD	AC
	I	P	

Competency: Process potted plants, planters, and dish gardens

### **Competency Builders:**

Follow general safety precautions

Identify foliage and blooming plants for specific plant needs (e.g., light, water, and temperature)

Clean plants and containers

Trim plants

Decorate plants and containers

Attach care instructions

Attach price tags and Universal Product Codes (UPC's)

Explain the correct procedure for handling potted plants in the flower shop

Decorate and package a potted flowering plant for sale

Identify plant pests and/or diseases

Decorate with fresh/dried flowers

EDU:	12	AD	AC
	I	P	

Competency: Construct floral arrangements

### **Competency Builders:**

Identify flowers and foliage

Identify arrangement style for occasion

Select flowers, foliage, and containers for specific tasks

Construct asymmetrical arrangements

Construct round arrangements

Construct oblong arrangements

Construct vertical arrangements

Construct horizontal arrangements

Construct triangular arrangements

Apply color principles

Apply principles and elements of design

Identify design variations

Identify principles of design

Identify principles of efficient production of multiple pieces

Construct bud vases

Construct handheld bouquets (e.g., hand-ties, presentation bouquets)

Use silk and dry materials

Arrange fruit baskets

Construct sympathy arrangements

Construct party arrangements

Construct wedding arrangements

Construct contemporary arrangements (e.g., free form, vegetative, parallel, etc.)

EDU:	12	AD	AC
	I	P	

Competency: Prepare materials for arrangements

#### **Competency Builders:**

Identify flowers/foliage

Wire and tape materials

Select and prepare accessories

Make bows

Prepare containers using proper mechanics (e.g., oasis, Sahara, tape, chicken wire, styrofoam, etc.)

Use tulle, ribbon, netting, and lace as needed

Spray/tint dried and live floral products as needed

Explain the proper use of various floral containers and bases

Explain sizes and use of florist wire

Explain sizes, grades, and uses of floral ribbon and netting

Explain use of various mechanical aids used in floral design

EDU:	12	AD	AC
	I	Р	

Competency: Design dish gardens (planters)

#### **Competency Builders:**

Follow general safety precautions
Select plant containers
Arrange plants in a container
Fill containers with soil
Identify foliage and blooming plants
Select plants that are environmentally compatible
Prepare planters for sale (e.g., cleaning plant and container, and watering)
Design custom dish gardens
Trim with fresh or dried flowers and/or ribbons

**BIL:** Recommended

EDU:	12	AD	AC
	I	R	

Competency: Prepare wedding flowers

## **Competency Builders:**

Identify proper flower/foliage

Follow wedding form instructions (e.g., proper bouquet knowledge and flower/foliage knowledge)

Construct novelty type bouquets

Construct colonial/nosegay bouquets

Construct arm-style bouquets

Construct assorted cascade bouquets

Construct traditional bouquets

Construct wedding boutonnieres and corsages

Construct rehearsal dinner, wedding and reception decorations

Set up rehearsal dinner, wedding and reception decorations

Dismantle wedding decorations

Service wedding

Perform maintenance of rental decorations

Assist with design of custom wedding flowers

BIL: Recommended

EDU:	12	AD	AC
	I	Р	

**Competency:** Prepare sympathy flowers

## **Competency Builders:**

Take specialty orders
Explain styles of sympathy arrangements
Identify proper flowers/foliage for style chosen
Identify funeral home procedures
Construct mechanics for assorted funeral pieces
Construct assorted casket pieces
Construct easel/standing sprays or wreaths
Construct vases
Construct pillows
Assist with design of custom sympathy flowers

EDU:	12	AD	AC
	I	P	

Competency: Maintain floral shop equipment and facilities

#### **Competency Builders:**

Follow general safety precautions

Use assorted floral cleaning supplies (e.g., bucket cleaner)

Clean display coolers

Clean storage containers and floral buckets

Perform general cleaning of showroom, work room, etc.

Maintain sidewalks and parking area (e.g., snow and ice removal)

Sharpen cutting tools

Lubricate cutting tools

Take an inventory

EDU:	12	AD	AC
	I	P	

Competency: Deliver merchandise

#### **Competency Builders:**

Follow general safety precautions

Read an order correctly

Load floral arrangements properly

Outline delivery route

Maintain company image (e.g., personal appearance and ability to present themselves in a professional manner)

Unload merchandise

Maintain a good driving record and a driver's license

Read a road map

Describe proper weather protection of floral arrangements

Describe proper procedure to follow for non-deliverable arrangements

EDU:	12	AD	AC
	I	P	

Competency: Prepare silk/dry arrangements

## **Competency Builders:**

Prepare mechanics/container

Use equipment properly (e.g., Pik machine, glue gun, hot melt/pan glue, cool melt, wire cutters, etc.)

Design custom silk/dry arrangements

EDU:	12	AD	AC
	I	Р	

Competency: Prepare flowers to wear

### **Competency Builders:**

Wire and tape flowers and foliage efficiently

Use floral glues and adhesives to construct or enhance flowers to wear

Make bows

Construct boutonnieres

Construct shoulder corsages

Construct wristlets

Construct fashion flowers (e.g., hat, purse, or shoe decorations)

Construct hair flowers

Package corsages and boutonnieres

Design custom flowers to coordinate with clothing

BIL: Recommended

EDU:	12	AD	AC
	ı I	R	

Competency: Take general customer's orders

## **Competency Builders:**

Take an order over the phone and in person

Interpret an order form

Take proper information needed for a specific order

Describe various types of floral industry wire services and the proper way to place and receive orders

Apply basic computer skills in using a wire service computer

Unit: Soil Science and Management

**BIL:** Essential

EDU:	12	AD	AC
·	I	P	

Competency: Explain the importance of soil

## **Competency Builders:**

Describe soil as a life supporting layer of material Describe soil as a medium for plant growth Identify agricultural uses of soil Identify nonagricultural uses of soil Describe land use in the U.S.

EDU:	12	AD	AC
·	I	P	

Competency: Describe the geology of soil

#### **Competency Builders:**

Identify the four major layers of the earth

Identify soil components

Define parent material

Differentiate among the major types of parent material

Describe the role of climate, organisms, and plants in soil formation

Describe the role of topography in soil formation

List the forms of plant life found in poor soil conditions

Define soil profile

Identify the soil horizons in a soil profile

Differentiate between surface soil and subsoil

EDU:	12	AD	AC
	I	P	

Competency: Describe composition of soil

### **Competency Builders:**

List the main components found in a normal soil

Explain the composition of the solid part of the soil

Describe the main sources of organic matter

List the approximate percentage in which each of the soil properties is found in a normal soil

Differentiate between soil low in organic matter and soil high in organic matter Explain the value of each soil component with regard to proper growth of plants

EDU:	12	AD	AC
	I	Р	

Competency: Identify physical properties of soil

#### **Competency Builders:**

Define soil texture

Define soil density and permeability

Describe soil structure

Define soil consistence

Define soil tilth

Describe the role of soil temperature

Explain the significance of soil color

Interpret the organic matter content of the surface soil using soil color

Interpret internal drainage of the subsoil by observing soil color

Differentiate between "light" and "heavy" soils

Determine the texture of a soil sample

Classify soil samples using the textural triangle as a guide

Explain the effects of soil structure on productivity

Explain why dark color is not always due to organic matter content

Explain the effects of organic matter on soil structure

Describe the effects of soil structure on infiltration, percolation, and the potential for ground water contamination

Explain how soil type affects crop identification

Compare root restricting boundaries (e.g., plow pan, fragipan, etc.)

Describe factors that contribute to the formation of tillage or traffic pans

Describe methods for alleviating traffic pans (e.g., subsoiling, reduced tillage, notill)

EDU:	12	AD	AC
	I	P	

Competency: Describe the biological properties of soil

### **Competency Builders:**

List the biological properties of soils

Explain how biological properties affect the nature and conditions of the soil

Identify the microorganisms that are found in the soil

List the soil microorganisms that are found in the soil

List the soil microorganisms that are beneficial to farmers

Describe the role of higher forms of plant and animal life in the soil

Explain the nitrogen and phosphorus cycle

Explain where the energy comes from to carry out the nitrogen transformations

Identify common bacteria in the nitrogen cycle

Explain the symbiotic relationship between bacteria and plants

Specify where bacteria are located in the roots of the plants

Explain nitrogen fixation

Identify the roles of different types of bacteria in nitrogen fixation

Describe the concept of mineralization and immobilization of plant nutrients by soil microorganisms

Explain the biological effects on soils when amended with fertilizers, pesticides, and recyclable materials such as municipal wastes

Describe the effects of poor drainage or waterlogging on soil properties and plant growth

EDU:	12	AD	AC
	I	P	

Competency: Describe the chemical properties of soil

## **Competency Builders:**

List the chemical properties of soil

Explain how chemical properties affect the biological properties of soil and the nature and conditions of the soil

Explain the effect of cation-exchange capacity on plant production

Explain the chemical effects on soil when amended with fertilizers, pesticides and recyclable materials such as municipal wastes

Describe the effect of sand, silt and clay content on water and nutrient holding ability of soil (CEC)

Explain how charges on clay particles affect nutrient retention

Compare different types of clay to soil nutrient availability

EDU:	12	AD	AC
•	I	P	

Competency: Define soil acidity and alkalinity

## **Competency Builders:**

Define pH

Create a chart of the pH scale to show degrees of soil acidity and alkalinity Conduct laboratory tests for acidity of common products (e.g., fresh milk, sour milk, orange juice, and lemon juice)

Explain how calcium affects soil acidity and the availability of other elements
Explain how pH symbols are used in denoting the degree of acidity and alkalinity
in soils

Describe the conditions that lead to soil acidity or alkalinity List the optimum soil pH range for the major crops Explain how soil acidity or basicity is corrected Explain how soil pH affects the availability of nutrients

EDU:	12	AD	AC
·	I	P	_

Competency: Demonstrate knowledge of soil water

### **Competency Builders:**

Define gravitational, capillary and hygroscopic water

Demonstrate the water holding capacities of sandy and clay soils

Determine soil water availability

List ways available water can be lost by soils

Identify the important factors in determining water movement in the soil

Explain the main purpose of water conservation

Explain how strip cropping can contribute to the conservation of soil water

Describe two types of mulch

Explain how production techniques influence the efficiency with which water is utilized by plants

Explain water holding capacity and how to determine field soil moisture

Explain the effect of texture and structure on field capacity

Describe responsibilities to ground water quality

Describe the plant, soil, and environmental factors that influence crop responses to irrigation

List several devices or methods used to schedule irrigation to conserve water and maximize crop yields

EDU:	12	AD	AC
	I	Р	

Competency: Explain liming to correct soil acidity

#### **Competency Builders:**

List the benefits obtained from liming a soil

List the steps involved in liming acid soils used for growing plants

Explain how lime reduces soil acidity

Explain how to determine the lime requirements for a specific crop

Identify different kinds of lime materials

Describe the appearance of plants growing in soils of different pH levels

List some sources of commercial lime

Describe different methods of applying lime and the type of equipment used Formulate a liming schedule for various crops

Explain the effect of soil acidity on soil structure, water infiltration and soil aggregation

List some problems and effects associated with over-liming soil Explain how lime particle size affects its ability to reduce soil acidity List several materials that can be used to increase soil acidity or lower pH Define dolomite limestone and calcitic limestone

EDU:	12	AD	AC
	I	P	

Competency: Test soil samples to determine characteristics

## **Competency Builders:**

Collect soil samples from test area
Complete soil data forms
Record texture, structure, temperature and color of each soil layer
Analyze soil data
Write report

EDU:	12	AD	AC
	I	P	

**Competency:** Test plant tissue samples

## **Competency Builders:**

Take plant tissue samples Submit prepared plant tissue samples and forms to analysis laboratory Interpret results of plant analysis

EDU:	12	AD	AC
	I	Р	

**Competency:** Test water samples

## **Competency Builders:**

Take water samples
Submit water samples to analysis laboratory
Interpret results of water test

EDU:	12	AD	AC
,	I	P	

Competency: Manage soil

#### **Competency Builders:**

Evaluate soil drainage
Identify soil texture and percent organic matter
Identify soil structure and type
Determine slope
Determine soil-use capability for agriculture
Determine suitability of soil for nonagricultural uses
Evaluate problems affecting soil use and management
Determine management and conservation practices
Implement management and conservation practices
Comply with government regulations and guidelines

EDU:	12	AD	AC
	I	P	

**Competency:** Practice soil conservation

## **Competency Builders:**

Define various types of erosion
Explain how water erosion occurs
Identify methods of predicting soil loss
Demonstrate use of the Universal Soil Loss Equation
Describe ways of controlling water erosion
Describe wind erosion and its effects

EDU:	12	AD	AC
	. I	P	

Competency: Demonstrate knowledge of irrigation and drainage

## **Competency Builders:**

Explain the importance of drainage
Define wetlands and wet soils
Describe methods of artificial drainage
Identify types of irrigation systems
Describe the use of irrigation
Analyze water quality

Unit: Environmental Science and Ethics

BIL: Recommended

EDU:	12	AD	AC
	I	R	

Competency: Explain the relationship between plants and animals within

ecosystems

#### **Competency Builders:**

Classify the major categories of organisms

Differentiate among biomes

Differentiate among types of ecosystems

Explain the dynamic nature of ecosystems

Define habitat and its importance to natural systems

Identify the functions of producers and consumers

Explain how biotic and abiotic factors affect producers and consumers

Categorize the various forms of animal life

Describes the interactions between producers, consumers, decomposers, and antagonists

Illustrate a food chain and food web

EDU:	12	AD	AC
·	I	P	

Competency: Describe the character and value of natural resources

## **Competency Builders:**

Describe the value of natural resources

Describe the major categories of natural resources

Describe the types and distributions of natural resources

Contrast the origins of natural resources

Differentiate between renewable and non-renewable natural resources

EDU:	12	AD	AC
	P	R	

**Competency:** Identify renewable natural resources

# **Competency Builders:**

Define renewable natural resources

Define the major categories of renewable natural resources

Identify the origins of renewable natural resources

Describe the value of renewable natural resources

EDU:	12	AD	AC
	P	R	

Competency: Identify non-renewable natural resources

# **Competency Builders:**

Define non-renewable natural resources

Define the major categories of non-renewable natural resources

Identify the origins of non-renewable natural resources

Describe the value of non-renewable natural resources

EDU:	12	AD	AC
	I	R	

Competency: Evaluate the exploitation of natural resources

# **Competency Builders:**

Describe natural events that altered the environment

Describe various methods used to obtain natural resources

Describe effects of obtaining natural resources on the environment

Identify the primary factor for the exploitation of natural resources

Identify the technological advances contributing to the exploitation of natural resources by industry

Identify the technological advances contributing to the exploitation of natural resources by agriculture

Identify the transportation advances contributing to the exploitation of natural resources

EDU:	12	AD	AC
	I	R	

**Competency:** 

Describe the impact of an increasing human population on

the environment

## **Competency Builders:**

Define doubling time, natural increase, natural decrease, rate of population change, and zero population growth

Interpret a population profile

Identify the results of the increases in the population on the environment

EDU:	12	AD	AC
	I	R	

**Competency:** 

Explain the consequences of resource use and abuse on the environment

#### **Competency Builders:**

Trace the effects of pollution through a food chain

Differentiate between biodegradable and non biodegradable products

Differentiate between organic farming and farming practices that incorporate the use of biocides and inorganic fertilizers and their comparative effects on the environment

Describe solid-waste disposal methods and groundwater contamination

Identify several causes for the reduction of habitat

Differentiate among the various types of habitat

Explain why preservation of habitat is essential

Define threatened, endangered, introduced and extinct as applied to both plant and animal species

List examples of threatened, endangered, introduced and extinct plant and animal species

Cite causes for the decrease of both plant and animal species

Explain the circumstances contributing to accidental, incidental, and deliberate resource abuse

Identify the results of overuse that occurred from exploitation

EDU:	12	AD	AC
	I	R	

**Competency:** 

Identify the impact of individuals/organizations on the development of environmental policies and issues

#### **Competency Builders:**

List prominent individuals/organizations involved with environmental issues Explain current trends in property rights and compensation Identify the major issues addressed by environmental organizations Identify major incidents that have resulted in legislation Match major events in restoration and / or conservation activities to the individuals/organizations responsible

Evaluate results of environmental restoration and conservation efforts Identify pros and cons of environmental organizations

EDU:	12	AD	AC
		I	

**Competency:** 

Evaluate the effects of research and education on

environmental issues

# **Competency Builders:**

Identify the methods of research used by both public and private agencies in restoration and conservation efforts

Identify the process used in restoration and conservation research Explain the interrelationship between research and education

Evaluate the outcome of environmental research projects

EDU:	12	AD	AC
	I	P	

Competency: Explain government's role in environmental restoration

and conservation

# **Competency Builders:**

Describe the effects legislation has had on the environment Identify federal and state agencies and their roles in restoration and conservation

EDU:	12	AD	AC
		I	

**Competency:** 

Describe the impact and implications of environmental

restoration

## **Competency Builders:**

Explain the importance of environmental restoration Cite examples of various levels of environmental restoration Identify the results of restoration efforts Describe economic issues of restoration projects Identify non-economic benefits of restoration activities

EDU:	12	AD	AC
:	I	R	

Competency: Describe the impact and implications of resource

conservation

# **Competency Builders:**

Explain the importance of resource conservation Cite examples of various levels of resource conservation Identify the results of conservation efforts Describe economic issues of conservation efforts Identify non-economic benefits of conservation activities

EDU:	12	AD	AC
		I	

**Competency:** 

Describe the impact and implications of environmental

preservation

# **Competency Builders:**

Explain the importance of environmental preservation Cite examples of environmental preservation Identify the results of preservation efforts Describe economic issues of preservation efforts Identify non-economic benefits of preservation activities

EDU:	12	AD	AC
	I	Р	

Competency: Identify the environmental ethical issues in agriculture

# **Competency Builders:**

Define organic agriculture

Explain the environmental issues regarding the use of genetically engineered plants in agriculture

Identify agricultural methods/practices that reduce negative effects on the environment

EDU:	12	AD	AC
	. I	P	

Competency: Identify the role of responsible stewardship in maintaining

a healthy environment

# **Competency Builders:**

Define responsible stewardship

Explain the need for responsible stewardship and environmental accountability Identify types of environmental accountability

Cite examples of each type of environmental accountability

Cite results stemming from responsible stewardship

Unit: Crop Pest Identification and Management

BIL: Essential

EDU:	12	AD	AC
	I	P	

**Competency:** Identify pests

#### **Competency Builders:**

Explain why identification of the pest is the first step in developing an effective pest control strategy

Define what a pest is

Identify common plant pests and their damages

Explain differences between continuous pests, sporadic pests, and potential pests

Identify fungi and bacteria and their symptoms

Identify symptoms of insects and nematodes

Classify feeding habits and life cycles of insects

Describe life cycles of bacteria and fungi

Identify noxious weeds and vines of crops and specialty plants

Identify insects, diseases, and other pathogens of crops and specialty plants

EDU:	12	AD	AC
	I	P	

Competency: Determine when pest control is needed

# **Competency Builders:**

Identify pest

Determine pest control goal (e.g., prevention, suppression, eradication)

Determine acceptable threshold level of pests

EDU:	12	AD	AC
	I	P	

Competency: Explain Integrated Pest Management (IPM)

# **Competency Builders:**

Explain the theory of Integrated Pest Management

Explain natural controls (e.g., climate, natural enemies, geographic barriers, food and water supplies, shelter)

Explain applied controls (e.g., host resistance, biological control, cultural control, mechanical control, sanitation, and chemical control)

EDU:	12	AD	AC
	I	P	

Competency: Plan an Integrated Pest Management control program

### **Competency Builders:**

Follow general safety precautions

Identify insects, diseases, weeds, and vertebrate pests

Identify pest damage

Calculate area to be covered

Complete certification requirements for prescribed chemical application

Evaluate chemical/cultural/biological control options

Interpret chemical labels and compatibility charts

Identify appropriate control methods

Identify disease-resistant and insect-resistant species

Estimate pest population numbers

Assess degree of damage

Outline when controls are needed

Recognize environmental limitations

Select control option

Take pesticide applicator test

Compute treatment cost

Document chemical application, methods, and results

EDU:	12	AD	AC
	. I	P	

Competency: Interpret pesticide labeling

#### **Competency Builders:**

Explain pesticide registration including Environmental Protection Agency (EPA), special local needs, and emergency exemptions

Explain "restricted-use pesticide"

Identify certification requirements for use of restricted-use pesticides

Interpret restricted use designation on labels

Interpret ingredient statement on pesticide labels

Interpret identifying information on pesticide labels (e.g., brand name, registration number, establishment number, manufacturer, net contents, type of pesticide, type of formulation)

Interpret precautionary statements (e.g., signal words, symbols, first-aid measures) Interpret hazard warnings (e.g., acute effects, delayed effects, allergic effects, personal protective equipment required, environmental hazards, physical hazards, and chemical hazards)

Interpret "Directions for use "requirements

Explain importance of following "Directions for use"

Interpret entry statements

Interpret storage and disposal requirements

Explain legal requirements of following label instructions

EDU:	12	AD	AC
	I	P	

Competency: Demonstrate knowledge of pesticide formulations

### **Competency Builders:**

Explain what a pesticide formulation is

Explain the difference between active ingredients and inert ingredients

Identify the factors to consider when choosing a formulation

Identify the characteristics, advantages, and disadvantages of different types of pesticide formulations

Explain the purpose of adjuvants

List several types of adjuvants

Explain compatability of pesticides

EDU:	12	AD	AC
	I	P	

Competency Explain how pesticides can affect the environment

#### **Competency Builders:**

Explain the meaning of the word environment

Distinguish between point-sources and non-point-sources of environmental contamination by pesticides

List ways that careless pesticide handling can lead to point-source pollution List the environmental factors that should be considered when a pesticide is accidentally or intentionally released into the environment

Gives examples of sensitive areas

Describe factors that influence whether pesticides will move off site in the air
Describe factors that influence whether pesticides will move off site in the water
Describe ways pesticides move off site in or on objects, plants, or animals
Explain how non-target plants and animals can be harmed by a pesticide
Describe the harmful effects that pesticides can have on surfaces
Identify pesticide handling activities that pose a threat to groundwater or
endangered species

Explain how pesticide use site determines special actions needed to protect the environment

Identify factors that determine whether pesticides will reach ground water Explain how to prevent pesticides from reaching groundwater Explain the importance of the Endangered Species Act when applying pesticides

EDU:	12	AD	AC
	I	P	

Competency: Use personal protective equipment when working with pesticides

#### **Competency Builders:**

Explain the concepts of hazard, exposure, and toxicity and how they relate to one another

Identify the four main ways pesticides can contact the human body

List the factors that determine how quickly pesticides will be absorbed through the skin

Explain the main types of acute effects pesticides can cause in humans

Explain the main types of delayed effects pesticides can cause in humans

Explain the main types of allergic effects pesticides can cause in humans

Describe general signs and symptoms of pesticide poisoning and of pesticide irritation

Describe appropriate first-aid for pesticide exposures

Describe your legal responsibility for following personal protective equipment requirements in pesticide labeling

Define chemical resistant

Identify factors that determine how well coveralls will protect the body

Explain the importance of wearing chemical-resistant gloves when handling pesticides

Identify when protective headgear should be worn

Describe appropriate protective headgear

Identify appropriate protective eyewear

Differentiate between dust/mist filtering respirators, vapor-removing respirators, and air-supplying respirators

Describe the special hazards that fumigants pose

Use appropriate personal protective equipment when handling or applying pesticides

Clean personal protective equipment

Maintain personal protective equipment

EDU:	12	AD	AC
	I	P	

**Competency:** Apply pesticides

#### **Competency Builders:**

Complete certification requirements for prescribed chemical application

Select pesticides according to product label

Describe how to protect the water source at the mixing site

Select appropriate site for mixing pesticides

Use appropriate personal protective equipment while mixing or loading pesticides

Explain safe handling of pesticide containers

Determine whether selected pesticides can be safely mixed

Explain closed system mixing and loading

Explain enclosed application systems

Explain when pesticide containment systems are appropriate

List the advantages of pesticide containment systems

Identify which types of pesticides must be diluted before application

Explain how to dilute pesticides

Dilute pesticides

Calculate the correct amount of dilute pesticide mixture for the application

Mix pesticides

Explain safety procedures that should be followed each time a pesticide is applied

Explain the importance of applying the correct amount of pesticide

Describe how to determine correct amount of pesticide to apply

Identify ways that application rates may be stated on product label

Calculate the application rate

Explain the importance of calibrating pesticide application equipment

Calibrate equipment

Explain the importance of rechecking calibration equipment frequently

Apply pesticides

Clean pesticide equipment

Describe what to do with rinsates from equipment cleanup

Describe personal cleanup after pesticide handling

Explain the importance of accurate records of pesticide applications

EDU:	12	AD	AC
	P	R	

Competency: Handle pesticides safely

## **Competency Builders:**

List safety precautions for transporting pesticides in a vehicle
Describe how to protect pesticide containers during transport
List actions needed to establish and maintain a safe storage site
Describe what to do when a pesticide containers leaks
Explain what to do with excess pesticides that are still usable
List acceptable ways to dispose of pesticide wastes
Dispose of pesticide containers in compliance with local, state, federal, and EPA regulations

List ways to avoid the need to dispose of empty pesticide containers Identify the three C's of spill management Explain the steps to take in each of the three C's Identify sources of assistance for managing a spill

**Unit:** Fertilization of Crops

**BIL:** Essential

EDU:	12	AD	AC
	I	P	

**Competency:** Practice GPS/GIS technology

# **Competency Builders:**

Practice grid sampling
Interpret sample results
Calculate recommendations
Evaluate yield results
Overlay different surfaces using GPS/GIS
Interpolate differences
Analyze VRT technology
Identify compaction differences
Analyze variable rate planting

EDU:	12	AD	AC
	P	R	

Competency: Identify nutrient requirements of plants

#### **Competency Builders:**

Identify groups into which nutrient requirements of plants are divided Describe the interactions of nutrient availability levels on nutrient toxicity and deficiency

Identify toxicity symptoms caused by excessive manganese and aluminum Identify major sources of N, P, K, S, Ca and Mg in soils Identify factors that influence the availability of these nutrients in soils Explain how soil pH affects nutrient availability Explain how different types of root systems affect plant nutrient uptake

EDU:	12	AD	AC
	I	P	

**Competency:** Determine fertilization needs

# **Competency Builders:**

Identify factors influencing fertilizer requirements
Use results of soil analysis to determine soil nutrient levels
Identify symptoms of plant nutrient deficiency
Determine crop nutrient needs
Determine amounts and kinds of nutrients and lime to apply
Evaluate effect of leaching on nutrient availability
Evaluate influence of soil pH on nutrient availability
Analyze manure-sample information
Define meaning of NPK and trace elements on fertilizer information

EDU:	12	AD	AC
·	. I	P	

Competency: Differentiate between organic and inorganic fertilizers

# **Competency Builders:**

Identify sources of inorganic fertilizers

Identify sources of organic fertilizers

Identify the main plant nutrients supplied by inorganic and organic fertilizers

Identify multi nutrient fertilizers

Explain how plants obtain carbon, oxygen, hydrogen, nitrogen, phosphorus, and potassium

Differentiate between a fertilizer grade and a fertilizer analysis

Explain the fertilizer ratio of a 5-10-5 grade

Explain where most of the nitrogen in the soil is derived

Describe the advantages and disadvantages of dry versus liquid fertilizer

Explain the advantages of foliar fertilization

Identify the factors that influence the efficiency of applied fertilizer such as leaching or fixation

EDU:	12	AD	AC
	Р	R	

**Competency:** Describe the application of fertilizers

## **Competency Builders:**

Explain the economic factors to consider in buying fertilizers

Describe the methods of applying solid and liquid fertilizers

Explain the purpose of the different placements of fertilizer in the soil

List the ways fertilizer benefits crop production

Explain how fertilizer applications can decrease crop production

Identify possible losses of each major nutrient and their influences on quality of water in lakes and streams, groundwater quality, and atmospheric quality

Practice calibration of equipment in applying fertilizer

Explain variable rate fertilization using GPS

EDU:	12	AD	AC
,	I	P	

Competency: Develop fertilization plan

## **Competency Builders:**

Interpret fertilization-rate charts
Select fertilizer analysis
Select fertilizer application method
Estimate costs of lime and fertilizer recommendations
Develop fertilization schedule
Determine amount of lime needed to maintain pH levels
Calculate fertilization rates required for maximum return per dollar

EDU:	12	AD	AC
	I	Р	

**Competency:** Fertilize crops

## **Competency Builders:**

Follow general safety precautions
Follow recommended amounts, timing, and placement of fertilizers
Interpret information on a fertilizer label
Mix fertilizer solutions
Calibrate fertilizer application rates
Transfer liquid fertilizer from nurse tank to applicator
Apply fertilizer
Apply fertilizer using computerized, on-the-go method
Recognize signs of fertilizer injury
Identify safety factors involved in handling NH3
Clean fertilizer equipment
Maintain fertilizer equipment
Handle all types of fertilizers

**Unit:** Crop Production

BIL:

Essential

EDU:	12	AD	AC
	P	R	

**Competency:** 

**Explain agricultural concepts** 

#### **Competency Builders:**

Differentiate between seed crops and vegetative crops

Describe the life cycle of a crop plant (e.g., from seed to vegetative stage to reproductive stage to seed)

Explain multiple cropping

Define forage

Explain the purpose of cover crops

Identify uses of tillage

Define conventional tillage

Define conservation tillage

Identify differences between conventional and conservation tillage

Describe cropping systems

Describe dryland farming

Describe organic farming

Compare organic farming to standard production systems

Describe hydroponic crop production

Describe permaculture

Explain crop rotation

Identify equipment used for tilling, seeding, cultivating, harvesting, etc.

Explain "fly-safe date"

Explain "Days-to-Maturity" rating system

Explain GDD (Growing Degree Days) maturity rating system

Explain factors to consider when choosing what crop to produce

Explain factors to consider when selecting seed

Describe procedures for harvesting crops

Describe procedures for storing crops

Explain the use of Global Positioning Systems in agriculture

Explain the use of Geographic Information Systems in agriculture

EDU:	12	AD	AC
	P	R	

Competency: Demonstrate a knowledge of crops common to Ohio

## **Competency Builders:**

Identify small grain crops common to Ohio
Identify corn crops common to Ohio
Identify forage crops common to Ohio
Identify alternative crops common to Ohio
Identify cover crops common to Ohio
Describe the economic importance of various crops
Describe the practices necessary to produce various crops
Identify the major advantages and disadvantages of various crops

EDU:	12	AD	AC
	P	R	

Competency: Explain plant nutrition as related to crop production

## **Competency builders:**

Define green manure crops

Explain the relationship of adequate fertilization to yields

Explain the relationship of tillering in grain crops

Explain the relationship of return on investment in crop production

Describe purpose of inoculation of legume seeds with nitrogen fixing organisms

Explain minimum, optimum, and luxury consumption of soil nutrients by the plant

Compare nutrients in the soil versus what plants get from air and water

EDU:	12	AD	AC
	P	R	

Competency: Explain plant fertilization as related to crop production

#### **Competency Builders:**

Identify deficiencies caused by the lack of the minor elements

Differentiate between organic and inorganic fertilizers

Describe the advantages and disadvantages of organic versus inorganic fertilizers

Identify global uses of inorganic and organic fertilizers

Describe the pollution hazards associated with over fertilization

Describe the latest techniques used to dispense only required amounts of fertilizer for crops

EDU:	12	AD	AC
	P	R	

Competency: Identify environmental factors affecting crops

#### **Competency Builders:**

List some warm and cool season crops

List optimum growth conditions for different types of plants

Explain how crops may be managed to maximize environmental resources (e.g., establishing crop canopies to intercept 100% of light energy prior to fruiting, planting at a date that ensures sufficient biomass to obtain maximum yield)

Describe the influence of day length on plant growth

Explain how the cycle of the seasons influences plant growth

Identify how planting date, row spacing, and plant population affect crop yield and quality

238

EDU:	12	AD	AC
	I	P	

Competency: Explain weed control of crops

# **Competency Builders:**

List ways weeds spread

List reasons weeds are harmful

List methods of weed control

Explain mode of action of common herbicides

Explain weed resistance to herbicides

Describe possible applications of genetic engineering and gene splicing to weed control

Explain how herbicides kill weeds

Explain why some herbicides are applied before or after a crop is planted

Explain why weed problems depend on when they occur during growing season of crop

Identify the major weed species and options available for controlling each

EDU:	12	AD	AC
	I	P	

Competency: Explain moisture control

## **Competency Builders:**

Define irrigation, mulch, organic matter, runoff, seepage, subsoiling, and tillage List three methods of moisture control

List the cultural practices used in moisture control (i.e., annually and at planting)
Describe importance of internal and external drainage in soils for crop production
Describe importance of irrigation to crops

Describe the methods of irrigation (e.g., drip, furrow, sprinkler, flood)

Explain the hydrologic cycle

Explain how irrigation causes salinity problems

Explain salt water intrusion in irrigation wells

Explain subsidence caused by removal of irrigation water

Describe methods used to reduce irrigation water loss

Explain the use of tensiometers and moisture meters

Explain permaculture

Explain irrigation scheduling

EDU:	12	AD	AC
	Р	R	

Competency: Test soil and plant tissues

# **Competency Builders:**

Take soil samples
Submit prepared soil samples and forms to analysis laboratory
Take plant tissue samples
Submit prepared plant tissue samples and forms to analysis laboratory
Interpret soil analysis results
Interpret plant analysis results
Monitor nutrient levels with infield equipment

EDU:	12	AD	AC
	I	R	

Competency: Determine land class capability

# **Competency Builders:**

Evaluate soil drainage
Identify soil texture and percent organic matter
Identify soil structure and type
Determine slope
Determine soil use capability and suitability
Explain factors to consider when planting on reclaimed land (minesoil)
Follow government regulations and guidelines
Use infrared mapping

EDU:	12	AD	AC
	I	R	·

Competency: Practice soil and water conservation

# **Competency Builders:**

Explain soil and water conservation structures and methods Maintain soil and water conservation structures and methods Evaluate planting and tilling methods Identify government programs Follow guidelines of government programs Manage residue to reduce erosion

EDU:	12	AD	AC
	P	R	

**Competency:** Develop plan for planting crops

## **Competency Builders:**

Identify a land use plan

Identify long-range conservation practices

Select crop varieties best suited for land, market and type of farm operation

Determine need for companion crop

Recommend crop rotation plan

Identify crop seeds

Interpret seed tag information

Interpret planting charts on seed bag

Calculate number of bushels of seeds needed

Evaluate stand of forage or winter wheat

Select seed

Determine seeding rate

Determine steps to improve stand

Calculate price per pound of pure live seed

Evaluate alternative crops

EDU:	12	AD	AC
	I	Р	

**Competency:** 

Determine procedures needed to manage crops from

planting to harvest

# **Competency Builders:**

Scout fields
Identify crop problems
Determine cause of crop problems
Develop fertilization plan
Develop plan to control insects and diseases
Develop plan to control weeds

EDU:	12	AD	AC
	I	Р	_

Competency: Manage crops

# **Competency Builders:**

Fertilize crops
Control insects and diseases
Control weeds
Apply pesticides

EDU:	12	AD	AC
,	. I	P	

Competency: Harvest grain crops

## **Competency Builders:**

Follow general safety precautions
Determine crop maturity
Calculate crop yields
Estimate harvest loss
Select equipment to reduce harvest loss
Operate equipment
Prioritize harvest areas
Distribute residue
Minimize soil compaction
Evaluate grain quality

EDU:	12	AD	AC
	I	P	

**Competency:** 

Interpret topographic and soil maps, aerial photographs,

and legal descriptions

#### **Competency Builders:**

Interpret legal land descriptions

Interpret map symbols

Interpret map legends

Identify true and magnetic north

Draw profiles using contour lines

Demonstrate knowledge of how to operate a computer-aided mapping program

Complete drawings using a computer-aided mapping system

Measure distances

Identify terrain types

Interpret elevations

Identify direction of water flow

Calculate area

Identify the location of field boundaries

Establish field boundaries

Interpret topical and aerial photographs

Calculate acreage based on field measurements

Unit: Agricultural Business Management and Marketing

BIL: Recommended

EDU:	12	AD	AC
·	I	R	

Competency: Identify sources of agricultural information and assistance

# **Competency Builders:**

Maintain a file of current technical information from universities, governmental agencies, and commercial companies

Maintain a reference file for periodicals and other publications
Attend seminars and workshops to update skills and knowledge
Use computer networking for up-to-date agricultural information
Identify associations and societies associated with agricultural professions

EDU:	12	AD	AC
	I	R	

**Competency:** 

Apply business skills and economic principles to the

agricultural industry

# **Competency Builders:**

Explain the basic economic principles in the agricultural industry

Explain the importance of local, state, and federal regulations and required documentation affecting the agricultural industry

Describe the types of agribusiness by organizational structure (e.g., sole proprietorship, partnership, corporation)

Select computer applications

Use computer applications

Analyze data

Determine the point of maximum profit

Determine fixed and variable costs of production

Use the fixed/variable concepts in making business decisions

Determine the resulting change in price of commodities when shifts in supply and demand take place

Describe how to manage inventory and determine selling price

Explain the importance of agribusiness records

Explain the types of insurance needs of an agricultural business

EDU:	12	AD	AC
	I	Р	

**Competency:** Follow legal requirements

# **Competency Builders:**

Identifies government agencies regulating farm operation Comply with employers' and employees' legal responsibilities Follow system for government regulation compliance

EDU:	12	AD	AC
	I	R	

Competency: Maintain supplies

# **Competency Builders:**

Set minimum and maximum inventory levels

Conduct physical inventories

Maintain computerized inventory records

Purchase supplies

Compare costs and quality of supplies from different sources

Make maximum use of vendor discounts

Calculate shipping charges

Regulate storage facility environment

Clean storage area

Inspect storage area for damage and hazards

EDU:	12	AD	AC
	· I	P	

Competency: Demonstrate sales skills

# **Competency Builders:**

Maintain product and service knowledge
Differentiate between product features and product benefits
Examine types of selling techniques
Identify types of customers
Identify customer buying motives and signals
Maintain prospective customer relationship
Follow up purchases and sales
Develop repeat customer contact list
Add customer to annual mailings
Develop a follow-up file

EDU:	12	AD	AC
	I	P	

Competency: Provide technical assistance

# **Competency Builders:**

Provide customer with informative materials
Interpret product labels
Demonstrate product use
Explain safety precautions regarding product use
Outline extent of product guarantee
Address customer complaints

EDU:	12	AD	AC
	I	R	

Competency: Demonstrate understanding of marketing principles

# **Competency Builders:**

Define basic marketing terminology (e.g., market, marketing mix, market penetration)

Identify purpose of marketing

Identify marketing activities

Identify elements in the marketing mix (e.g., price, product, promotion, place)

Explain market share

Identify factors that affect market share

Explain margin analysis

Explain market integration

Describe cooperative marketing

Explain methods of pricing farm commodities

Identify governmental regulations affecting the marketing of agricultural products

EDU:	12	AD	AC
·	I	R	

**Competency:** Describe marketing strategy

# **Competency Builders:**

Identify marketing strategies for differing products and services
Differentiate between mass-market and market segmentation approaches
Describe the process of identifying a market for a product or service
Describe the role of margin analysis in developing market strategy
Give examples of product positioning

EDU:	12	AD	AC
	I	R	

**Competency:** 

Demonstrate a basic knowledge of international

agricultural trade

#### **Competency Builders:**

Identify the major U.S. agricultural export markets

Identify major U.S. agricultural export crops

Explain how U.S. agriculture can remain competitive

Identify factors to consider when deciding whether to enter the export market

Explain trade barriers, duties, and tariffs

Identify organizations that can provide assistance in international agricultural trade

Explain the impact of trade agreements such as NAFTA and GATT on agriculture

EDU:	12	AD	AC
	I	P	

Competency: Develop a marketing plan

# **Competency Builders:**

Determine business objectives
Analyze competition
Identify potential buyers
Calculate break even point
Determine pricing goals
Identify factors affecting pricing
Compare pricing strategies
Identify marketing channels
Select marketing channels
Determine most advantageous method of marketing crops
Determine when to market
Identify distribution channels
Develop marketing goals

EDU:	12	AD	AC
	I	P	

Competency: Promote company image

# **Competency Builders:**

Explain importance of image
Identify factors affecting image, positive and negative
Project company image
Exhibit good personal hygiene
Perform quality work
Follow instructions and uniformity
Keep equipment clean
Follow dress code
Handle customer complaints

Handle customer complaints
Communicate positively with customers
Read company manual

Maintain continuity and uniformity of company logo Develop customer awareness programs

EDU:	12	AD	AC
·	P	R	

**Competency:** Conduct sale

# **Competency Builders:**

Greet customers
Use appropriate questioning techniques
Use appropriate selling techniques
Identify customer needs, problems and recommendations
Describe services and expectations
Explain extent of guarantee
Access support services
Close sale
Use good telephone skills
Compute taxes

EDU:	12	AD	AC
	P	R	

**Competency:** Prepare estimate

# **Competency Builders:**

Calculate square footage and cubic yards
Use price list
Estimate total amount of materials needed
Estimate labor requirements
Estimate fixed costs
Estimate profit and loss margins

EDU:	12	AD.	AC
	P	R	

Competency: Maintain price lists and catalogs

# **Competency Builders:**

Compare prices of similar products and services Outline material and service availability Keep product and service catalogs current Keep profit and loss in line

EDU:	12	AD	AC
	I	R	

Competency: Price merchandise

# **Competency Builders:**

Estimate fixed and variable expenses
Calculate markup
Calculate break-even point
Compare pricing strategies
Identify factors affecting pricing
Price merchandise
Prepare merchandise for inventory or display
Use computerized pricing system
Attach price tags

EDU:	12	AD	AC
	I	R	

Competency: Display merchandise

# **Competency Builders:**

Design displays
Set up displays
Select items for display
Use props
Identify display areas

# **Unit:** Greenhouse Management

**BIL:** Recommended

EDU:	12	AD	AC
	I	P	

Competency: Test soil, water, and plant tissues

## **Competency Builders:**

Follow general safety precautions
Take soil sample
Prepare soil to be tested
Collect plant tissues to be tested
Determine pH level
Determine soluble salt levels
Take water samples
Interpret results of water test
Interpret results of soil test
Interpret results of plant tissue test
Realize need for professional help

EDU:	12	AD	AC
	R	P	

**Competency:** Prepare media mixes

## **Competency Builders:**

Follow general safety precautions Shred planting media materials Mix planting media materials Pasteurize media Identify media functions Identify media components

List the requirements of a good growing media for potted plants (e.g., pH, porosity)

Identify the ingredients used to prepare an artificial growing media Explain the process of soil pasteurization

Identify the limitations of the various growing mediums

Identify the nutrients required for plant growth

Identify economics of mix-your-own vs. commercial mix (e.g., labor, raw materials, equipment)

EDU:	12	AD	AC
	R	P	

**Competency:** Prepare for propagation

#### **Competency Builders:**

Explain propagation (e.g., sexual, asexual)

Follow general safety precautions

Identify tools and equipment used in greenhouse crop propagation

Explain routine maintenance procedures for greenhouse equipment and facilities (e.g., growth chambers, seeders)

Describe the propagation requirements for the major floriculture crops produced in the local area

Identify major bedding, foliage, flowering, and seed stock used for propagation List advantages and disadvantages of the different types of greenhouse benches relating to propagation

Grade cuttings for size

Interpret seed germination information

Identify containers

Identify environmental factors of propagation

Select media

Sanitize propagation equipment, areas, and containers

Identify planting depth

Identify propagation problems and solutions (e.g., seed sowing, cutting, timing)

Outline plant scheduling

Explain economics and quality issue of self-propagation and/or purchasing from reputable source

Explain seed germination

Explain use of rooting hormones

EDU:	12	AD.	AC
	R	P	

Competency: Manage plant production

## **Competency Builders:**

Follow general safety precautions

Demonstrate proper water application

Explain the correct quantity of water to apply

Explain the layout of automatic watering systems

Identify factors that would reduce the quality of water

Select the appropriate container for a particular plant or crop

Explain the purpose of growth regulating chemicals

Outline plant scheduling

Sow seeds

Plant bulbs

Force bulbs

Take cuttings

Label plants and cuttings

Prepare growing media for different types of greenhouse crops and use of soil handling equipment

Transplant seedlings and rooted cuttings

Explain the reasons for pinching, spacing, and disbudding specific greenhouse crops

Describe the types and uses of commonly used automatic greenhouse watering systems

Monitor plant growth (e.g., graphical tracking)

EDU:	12	AD	AC
	R	P	

**Competency:** Fertilize plants in greenhouse operation

## **Competency Builders:**

Follow general safety precautions

Interpret fertilizer bag labels (e.g., micro and macro nutrients)

Mix fertilizer solutions

Apply liquid fertilizer

Apply dry fertilizer

Identify fertilizer injectors

Use fertilizer injectors

Identify fertilization practices and terminology

Identify symptoms of nutrient deficiency

Determine kind of fertilizer to apply

Interpret manufacturer's fertilization rate charts

Calibrate fertilizer application equipment

Calculate the amount of fertilizer needed for an injector stock solution based on the PPM of nitrogen to be applied and the ratio of the injector

Determine fertilizer applications for various crop and plant growth situations

Identify the major nutrient deficiency symptoms

Explain why and when leaching is necessary

EDU:	12	AD	AC
	R	P	

**Competency:** Regulate greenhouse environment

#### **Competency Builders:**

Follow general safety precautions

Install shade cloth

Apply glass shading compound

Identify supplemental lighting

Set timers to regulate lighting

Hang lath or saran cloth

Use light meters

Hand irrigate plants

Install irrigation system (e.g., drip, computer irrigation)

Use irrigation system

Identify heating systems (e.g., centralized, localized)

Identify cooling system (e.g., natural ventilation, fan/pad)

Control humidity

Adjust temperatures for plants (e.g., DIF, energy conservation)

Identify carbon dioxide levels

Identify factors influencing plant growth

Identify environmental control system (e.g., computer system)

Explain operation of thermostats and cycle timers

Identify glazing on a greenhouse

Apply mechanical and electrical safety as it applies in greenhouse operation

Control lighting for short and long day sensitive plants

Explain the effects of night and day temperatures on plant growth

Explain light requirements in terms of intensity and duration for plants being grown in a production environment

EDU:	12	AD	AC
	I	R	

**Competency:** Compare greenhouse structures

# **Competency Builders:**

Follow general safety precautions
Identify life expectancy of structure
Identify space utilization
Identify types of ventilation systems
Identify types of structures

Differentiate among types of greenhouse structures and their layout

List the requirements necessary for good plant growth

Explain the use of cold frames and lath houses in conjunction with the greenhouse

Explain light requirements in terms of intensity and duration for plants being grown in a production environment

Control lighting for short and long day sensitive plants

Describe types of heating and cooling systems used in greenhouse production

Explain the effect of night and day temperatures on plant growth

Explain how various air quality factors are maintained for good plant growth

EDU:	12	AD	AC
	I	R	

**Competency:** Perform post harvest care

# **Competency Builders:**

Define post harvest care

Follow general safety precautions

Explain the procedures involved in planning a greenhouse crop so production will be in line with seasonal demand for the finished product

Explain how potted plants should be packaged and handled during harvesting and shipment

Explain care upon receipt of product

Explain how cut flowers should be handled during harvesting and shipment

Identify the market possibilities in the local area for a given horticulture crop

Develop a crop rotation for a year of greenhouse production

Identify harvest stages

Cut plants/flowers

Count and bunch plants/flowers

Regulate cold storage unit temperature

Explain plant maintenance to preserve plant viability

Identify plant life expectancy

Demonstrate safety practices when harvesting, processing, and shipping plants

Differentiate between a production greenhouse environment and a maintenance home/office environment

EDU:	12	AD	AC
	I	R	ø

Competency: Maintain nursery and greenhouse equipment/facilities

## **Competency Builders:**

Follow general safety precautions

Clean facility

Replace or repair plastic covering on greenhouse structure

Clean heating and cooling systems

Perform general maintenance by hanging doors

Perform general maintenance by repairing doors

Perform general maintenance by replacing windowpanes

Perform general maintenance by replacing damaged sections of saran or black cloth

Perform general maintenance by replacing damaged support wires for saran or black cloth

Perform general maintenance by constructing benches and frames

Perform general maintenance by repairing benches and frames

Perform general maintenance by shading greenhouse glass

Perform general maintenance by lubricating parts

Perform general maintenance on ventilation systems

Perform general maintenance by adjusting belts on equipment

Perform seasonal equipment pre-check (e.g., heating system)

Inspect assembled equipment for operating defects
